LONGi Green Energy Technology Co., Ltd.
2025 Semi-Annual Report

Kindly reminder: The Semi-Annual Report 2025 in English is for reference only. The Chinese version shall prevail in case of any discrepancy between the two versions.

Important Notes

I. The Board of Directors, directors and senior management of the Company, warrant the truthfulness, accuracy, and completeness of the information in this Semi-Annual Report, confirm that there are no misrepresentations, misleading statements, or material omissions in this Semi-Annual Report, and agree to assume several and joint legal responsibilities in connection with this Semi-Annual Report.

II. All directors attended the board meeting of the Company.

III. This Semi-Annual Report is unaudited.

IV. Zhong Baoshen, the person in charge of the Company, Liu Xuewen, the person in charge of accounting and the accounting firm (accountant in charge), warrant the truthfulness, accuracy, and completeness of the financial statements contained herein.

V. Profit distribution plan or capital reserve capitalization plan for the reporting period adopted by the Board of Directors through resolution

N/A

VI. Disclaimer of forward-looking statements

√ Applicable □ Not Applicable

Such forward-looking statements as future plans and development plans involved in this report do not constitute any substantial commitment of the Company to investors. Investors are advised to exercise caution of investment risks.

VII. Whether there is any non-operational use of funds by the controlling shareholder or any other related parties

No

VIII. Whether there is any guarantee provided to external parties in violation of the prescribed decision-making procedures

No

IX. Whether more than half of the directors cannot ensure the authenticity, accuracy, and completeness of the Company's disclosed semi-annual report

No

X. Significant risk warning

The Company has detailed the possible risks in this report. For more information, please refer to "V. (I) Possible Risks" in Section III.

XI. Others

□ Applicable √ Not Applicable

Contents

List of Documents for Future Reference	Financial statements signed and sealed by the legal representative of the Company, person in charge of accounting affairs, and person in charge of the accounting firm (accountant in charge)
	Originals of all documents and announcements of the Company publicly disclosed on the website designated by CSRC during the reporting period

Section I Definitions

Unless the context otherwise requires, the following terms will have the following meanings in this report:

Definitions of Common Terms		
LONGi Green Energy/Company/the Company/the parent company	Refers to	LONGi Green Energy Technology Co., Ltd.
Ningxia LONGi	Refers to	Ningxia LONGi Silicon Materials Co., Ltd., a wholly-owned subsidiary of the Company
Ordos LONGi	Refers to	Ordos LONGi Silicon Materials Co., Ltd., a wholly-owned subsidiary of the Company
LONGi Solar	Refers to	LONGi Solar Technology Co., Ltd., a wholly-owned subsidiary of the Company
Taizhou LONGi Solar	Refers to	Taizhou LONGi Solar Technology Co., Ltd., a wholly-owned subsidiary of LONGi Solar
Chuzhou LONGi Solar	Refers to	Chuzhou LONGi Solar Technology Co., Ltd., a wholly-owned subsidiary of LONGi Solar
Xianyang LONGi Solar	Refers to	Xianyang LONGi Solar Technology Co., Ltd., a wholly-owned subsidiary of LONGi Solar
Jiaxing LONGi Solar	Refers to	Jiaxing LONGi Solar Technology Co., Ltd., a wholly-owned subsidiary of LONGi Solar
Jiaxing LONGi PV	Refers to	Jiaxing LONGi PV Technology Co., Ltd., a wholly-owned subsidiary of LONGi Solar
Jiaxing LONGi Photoelectric	Refers to	Jiaxing LONGi Photoelectric Technology Co., Ltd., a wholly-owned subsidiary of LONGi Solar
Ordos LONGi PV	Refers to	Ordos LONGi PV Technology Co., Ltd., a wholly owned subsidiary of LONGi Solar
Xixian New Area PV Technology	Refers to	LONGi Green Energy PV Technology (Xixian New Area) Co., Ltd., a wholly-owned subsidiary of LONGi Solar
Heshan LONGi PV	Refers to	Heshan LONGi PV Technology Co., Ltd., a wholly owned subsidiary of LONGi Solar
Tongchuan LONGi PV	Refers to	Tongchuan LONGi PV Technology Co., Ltd., a wholly owned subsidiary of LONGi Solar
LONGi Green Energy Investment	Refers to	Xi'an LONGi Green Energy Investment Co., Ltd., formerly known as Xi'an LONGi Green Energy Venture Capital Management Co., Ltd., a wholly-owned subsidiary of the Company
LONGi Hydrogen Energy	Refers to	Xi'an LONGi Hydrogen Energy Technology Co., Ltd., a holding subsidiary of LONGi Green Energy Investment
Wuxi Hydrogen Energy	Refers to	Wuxi LONGi Hydrogen Energy Technology Co., Ltd., a wholly-owned subsidiary of LONGi Hydrogen Energy
Xi'an Hydrogen Energy	Refers to	Xi'an LONGi Hydrogen Energy New Materials Co., Ltd., a wholly-owned subsidiary of LONGi Hydrogen Energy
Clean Energy	Refers to	Xi'an LONGi Clean Energy Co., Ltd., a wholly owned subsidiary of the Company

Tongxin LONGi	Refers to	Tongxin LONGi New Energy Co., Ltd., a joint-stock company of the Company
LONGi Tianhua	Refers to	Zhongning LONGi Tianhua New Energy Co., Ltd., a joint-stock company of the Company
Sichuan Yongxiang	Refers to	Sichuan Yongxiang New Energy Co., Ltd., a joint-stock company of the Company
Yunnan Tongwei	Refers to	Yunnan Tongwei High-purity Polysilicon Co., Ltd., a joint-stock company of the Company
CENTER INT	Refers to	Center International Group Co., Ltd., a joint-stock company of the Company
Illuminate	Refers to	Illuminate USA LLC, a joint-stock company of the Company
Pingmei LONGi	Refers to	Pingmei LONGi New Energy Technology Co., Ltd., a joint-stock company of LONGi Solar
Yingfa Derui	Refers to	Yibin Yingfa Derui Technology Co., Ltd., a joint-stock company of LONGi Solar
Zhejiang MTCN	Refers to	Zhejiang MTCN Technology Co., Ltd., stock name: "Zhongjing MTCN"
Articles of Association	Refers to	*Articles of Association of LONGi Green Energy Technology Co., Ltd.*
Company Law	Refers to	*Company Law of the People's Republic of China*
CSRC	Refers to	China Securities Regulatory Commission
SSE	Refers to	Shanghai Stock Exchange
Reporting period	Refers to	January-June 2025
RMB/RMB 10,000	Refers to	RMB/RMB 10,000, unless otherwise specified
Polysilicon	Refers to	High-purity silicon materials with a purity exceeding 99.9999%
Ingot	Refers to	Rod-like monocrystalline silicon grown from polysilicon, exhibiting a monocrystalline morphology
Wafer	Refers to	A square or octagonal slice cut from a monocrystalline ingot
Solar cell	Refers to	A solar power generation unit that converts the solar radiant energy into electrical energy using semiconductor materials based on the principle of photoelectric conversion, also known as a "PV cell"
Solar module	Refers to	A module encapsulated by multiple solar cells connected in series and parallel, also referred to as "PV module". It can either be used independently or arranged in series or parallel to serve as a power generation unit for an off-grid or grid-connected solar power supply system.
P-type cell	Refers	A solar cell made of P-type monocrystalline wafer. In the

	to	production process of monocrystalline ingot, triad is doped to replace silicon atoms, thereby forming P-type monocrystalline ingot.
N-type cell	Refers to	A solar cell made of N-type monocrystalline wafer. In the production process of monocrystalline ingot, pentad is doped to replace silicon atoms, thereby forming N-type monocrystalline ingot.
MW	Refers to	Megawatt, a unit of power where 1 megawatt equals 1,000 kilowatts
GW	Refers to	Gigawatt, a unit of power where 1 gigawatt equals 1,000 megawatts
PERC	Refers to	Passivated Emitter and Rear Contact cell technology, which forms a passivation layer on the cell's back using special materials as a back reflector, thereby increasing the absorption of long-wave light and the potential difference between the p-n electrodes, reducing electron recombination, and improving efficiency
TOPCon	Refers to	Tunnel Oxide Passivated Contact cell technology, which creates an ultra-thin silicon oxide layer on the cell's back and then deposits a thin doped silicon layer to form a passivated contact structure
HJT	Refers to	Heterojunction Technology with an intrinsic amorphous layer, where both crystalline and amorphous silicon coexist in the cell, and the presence of amorphous silicon facilitates improved passivation effects
BC	Refers to	Back Contact cell technology, in which both positive and negative electrodes are positioned on the cell's back while the front remains free of metal electrodes, thereby reducing shadow loss due to the reflection of incident light by the front electrodes. A BC cell features strong compatibility and can be integrated with HJT, TOPCon, and other technologies to enhance cell efficiency
HPBC	Refers to	Hybrid Passivated Back Contact cell technology, a high-efficiency BC cell technology independently developed by the Company, featuring no busbar on the front side, high conversion efficiency, and an aesthetically pleasing design
HBC	Refers to	Heterojunction Back Contact cell technology, which combines the HJT cell structure with the BC cell structure to create a new type of solar cell structure. By combining the high short circuit current of the BC cell with the high open circuit voltage of the HJT cell, this technology enhances cell efficiency.
HIBC	Refers to	Hybrid Interdigitated Back-Contact cell technology independently developed by the Company. By leveraging the high compatibility of BC technology, this technology represents an innovative application of high- and low-temperature composite passivation technology in the back contact structure, achieving enhanced cell efficiency.
Crystalline silicon-perovskite tandem	Refers to	A tandem structure formed by stacking the perovskite solar cell and the crystalline silicon solar cell together to create a gradient bandgap structure, thus achieving higher photoelectric conversion efficiency and improved performance
U.S. OBBB Act	Refers to	*One Big Beautiful Bill Act*, commonly referred to as the "OBBB Act", signed into law by the President of the United States in July

		2025

Section II Company Profile and Key Financial Indicators

I. Company Information

Chinese name of the Company	隆基绿能科技股份有限公司
Chinese abbreviation	隆基绿能
English name of the Company	LONGi Green Energy Technology Co., Ltd.
English abbreviation	LONGi
Legal representative of the Company	Zhong Baoshen

II. Contact Information

	Secretary of the Board of Directors	Securities Affairs Representative
Name	Liu Xiaodong	Wang Hao
Address	No. 8369, Shangyuan Road, Economic and Technological Development Zone, Xi'an	No. 8369, Shangyuan Road, Economic and Technological Development Zone, Xi'an
Tel.	Investor hotline: 029-86473930 Service hotline: 4008601012	Investor hotline: 029-86473930 Service hotline: 4008601012
Fax	029-86689601	029-86689601
E-mail	longi-board@longi.com	longi-board@longi.com

III. Changes in Basic Information

Registered address	No. 388, Middle Aerospace Rd, Chang'an District, Xi'an City
Historical changes in registered address	None
Office address	No. 8369, Shangyuan Road, Economic and Technological Development Zone, Xi'an
Postal code of the office address	710018
Company website	http://www.longi.com
E-mail	longi-board@longi.com
Query index of changes during the reporting period	None

IV. Changes in Information Disclosure and Archiving Location

Newspapers designated by the Company for information disclosure	China Securities Journal, Shanghai Securities News, Securities Times, and Securities Daily
Website for semi-annual report disclosure	www.sse.com.cn
Archiving location for semi-annual report	Office of the Board of Directors
Query index of changes during the reporting period	None

Section III Management Discussion and Analysis

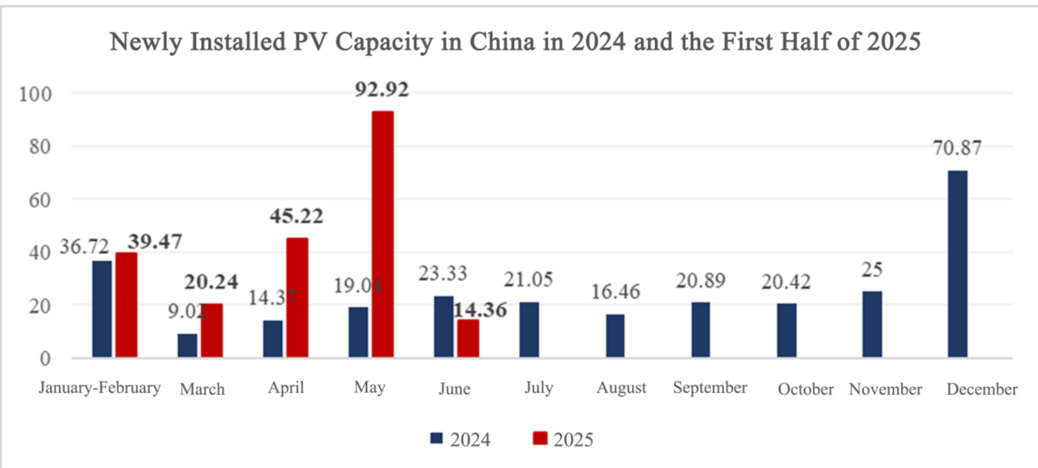
I. Description of the Industry Development and Main Business of the Company During the Reporting Period

(I) Industry development during the reporting period

In 2025, the global PV market transitions from years of explosive growth to a stable development phase. In the first half of the year, the involution competition fueled by an imbalance between supply and demand in the PV industry persisted. Policies supporting the comprehensive market entry of new energy sources have introduced significant changes to the revenue models of PV projects. Furthermore, the complex and challenging international trade environment has profoundly influenced the industry's global landscape. The sector is currently navigating a challenging period of transformation and upgrading, necessitating supply-side reforms and technological innovation to guide it back toward sustainable development.

1. Domestic policies drive a short-term installation rush, while low-price competition leads to sustained industry losses

During the reporting period, a series of reform policies targeting the domestic new energy power market were introduced, including comprehensive market entry measures for new energy sources and updated management measures for distributed generation. These initiatives have facilitated the transition of the new energy sector from a system of "guaranteed purchase and subsidies" to a fully market-oriented model with mechanism-based electricity tariff. The transition period between the old and new policies has resulted in a short-term installation rush in the first half of the year. According to data from the National Energy Administration, China's newly installed PV capacity reached 212.21 GW in the first half of 2025, reflecting a year-on-year increase of 107%. Notably, distributed PV generation accounted for 53% of the total installed capacity. However, from the manufacturing perspective, the growth rate of domestic PV cell and module production fell below 15% in the first half of the year, while polysilicon and wafer production experienced negative growth. Prices across various segments of the industrial chain remain depressed due to a persistent imbalance between supply and demand, leading to continued comprehensive losses within the PV industry.



2. Overseas market diversification accelerates, while trade barriers reshape the global supply chain

From the perspective of overseas markets, the global market layout is becoming increasingly diversified due to various factors, including energy transitions and localization policies in different countries, and increased trade barriers. These changes present significant challenges to the supply chain. Export data for the first half of the year indicate a slight decline in module exports from China. Demand in traditional European markets has decreased due to high base effects, subsidy reductions, and low electricity tariffs. In contrast, emerging markets in the Middle East, Africa, and Asia-Pacific region are experiencing robust growth, driven by energy transformation and increasing electricity demand. The U.S. market is projected to maintain a high level of newly installed capacity in 2025; however, it faces a complex and evolving new energy policy landscape, compounded by increased trade barriers. In June 2025, the U.S. issued its final ruling regarding antidumping and countervailing duties (AD/CVD) on PV cell and module imports from four Southeast Asian countries—Cambodia, Malaysia, Thailand, and Vietnam. More recently, the U.S. initiated AD/CVD investigations targeting India, Indonesia, and Laos, alongside a Section 232 investigation into polysilicon imports. In July, the U.S. OBBB Act took effect, accelerating the phaseout of new energy subsidy programs, including the investment tax credit (ITC) and production tax credit (PTC). Additionally, stricter regulations have been introduced to restrict foreign entities of concern (FEOC) from accessing clean energy subsidies, impacting medium- and short-term PV demand in the U.S. after 2026. As a result, businesses operating in the country face significant challenges in planning production capacity. Furthermore, the U.S. has implemented reciprocal tariffs globally this year, triggering a new trade war. These policies are expected to increase uncertainty within the global economic and trade system, driving a rapid shift in PV deployment toward emerging market regions and reshaping the global supply chain landscape.

3. BC technology sees rapid development, expanding PV applications across multiple scenarios and formats

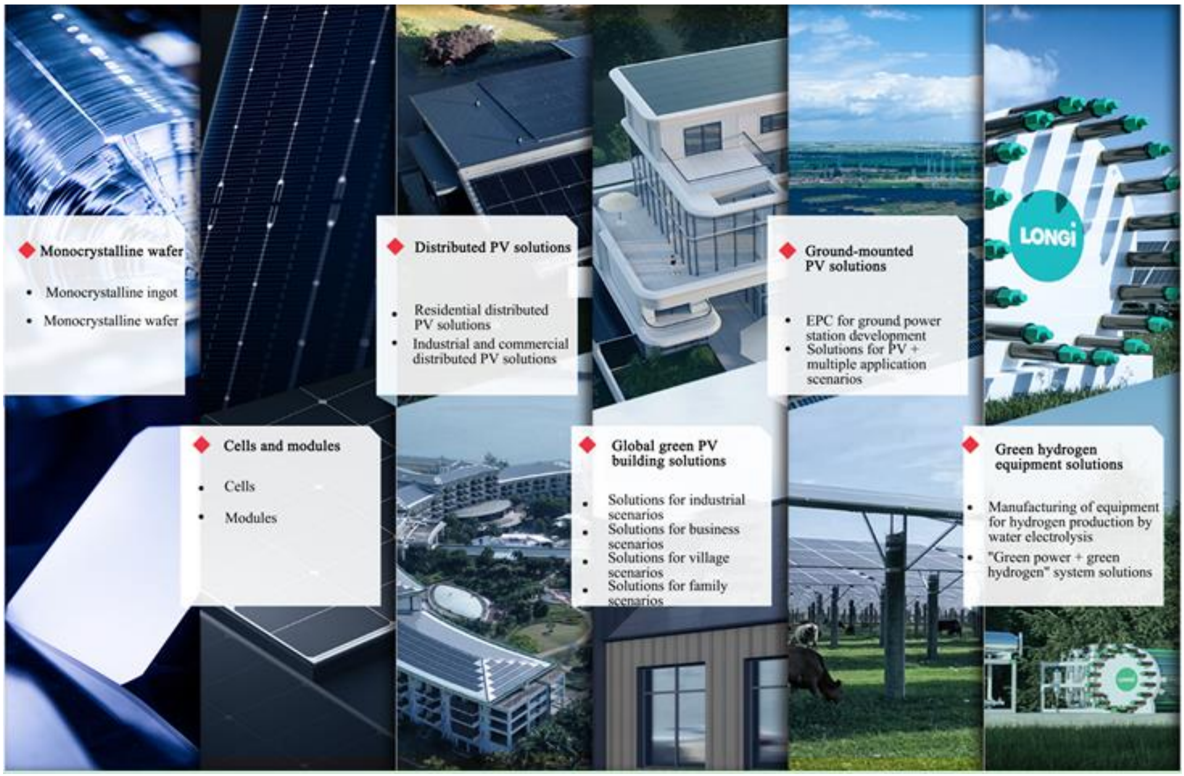
During the reporting period, BC technology experienced rapid development, gaining market favor by virtue of its high efficiency, appealing aesthetics, and safety and reliability. Its differentiated advantages have become increasingly apparent amidst the involution competition. Concurrently, the vigorous growth of diverse application scenarios—such as building-integrated photovoltaics (BIPV), offshore PV, and balcony PV—combined with the ongoing evolution of innovative business models like PV-storage integration and zero-carbon parks, is leading the industry toward greater refinement and diversification. Product innovations tailored to specific scenarios will provide enterprises with opportunities for differentiated development. Moreover, with the support of China's policies related to PV sand control, direct green power supply, and supercharging stations, PV applications are expected to expand into broader sectors at an accelerated pace.

4. Intensive measures are in place to address the involution competition in the industry, and differentiated competition will be the key to achieving breakthroughs

The PV industry is a strategic emerging sector with international competitive advantages in China, making it a top priority for government support in its healthy development. Currently, the National Development and Reform Commission (NDRC), the Ministry of Industry and Information Technology (MIIT) of the People's Republic of China, along with other authorities and industry associations, are implementing intensive measures to address the involution competition in the industry. These efforts aim to regulate disordered low-price competition among enterprises in accordance with laws and regulations, promote improvements in product quality, and facilitate the structured phaseout of outdated production capacity while supporting competitive enterprises to improve industry concentration. Through a combination of policy guidance, industry self-regulation, and technological innovation, the PV industry is expected to realign itself toward a path of rational and sustainable development. Furthermore, enterprises that excel in product and business model innovation, cost control, and global expansion will be poised to address the involution competition by leveraging their differentiated advantages, paving the way for a new phase of high-quality development.

(II) Main business of the Company

The Company is committed to becoming the world's most valuable solar technology company, with the mission of "making the best of solar energy to build a green world". Aiming to position itself as a "steady, reliable and technology-leading" brand, and by focusing on technological innovation, the Company has developed business segments including monocrystalline wafers, cells and modules, distributed PV solutions, global green PV building solutions, ground-mounted PV solutions, and green hydrogen equipment, offering "green power + green hydrogen" products and solutions to support global zero-carbon development.



Leveraging its exceptional technological innovation capabilities, cost advantages, intelligent manufacturing capabilities, and synergies within the industrial chain, the Company has established a vertically integrated PV manufacturing ecosystem, supported by domestic and international bases as well as a global marketing network. With operations spanning more than 160 countries and regions worldwide, the Company has developed an industry-leading global strategic presence. As a world-leading PV enterprise, the LONGi brand holds significant influence in the global PV sector. The Company has ranked first globally in cumulative shipments of monocrystalline wafers over the past decade and has consistently ranked among the top two in module shipments over the past six years. In evaluations conducted by the world's most authoritative third-party PV module testing agencies, the Company's module products have received the "Overall Highest Achiever" Award from the U.S. Renewable Energy Testing Center (RETC) for 7 consecutive years and Kiwa PVEL's "Top Performer" Award in Reliability Testing for 8 consecutive years, thanks to their exceptional reliability, performance, and quality.

Description of the Company's new significant non-main business during the reporting period
□ Applicable √ Not Applicable

II. Discussion and Analysis on Operations

In the first half of 2025, homogeneous competition in the PV industry intensified due to an imbalance between supply and demand. This was further exacerbated by comprehensive domestic power market reforms, ongoing global geopolitical conflicts, and the escalation of trade wars amid shifting international political and economic dynamics. Collectively, these factors have heightened uncertainty and risk in the business environment for enterprises. Facing these severe industry challenges, the Company has adopted a forward-thinking approach by making preparations for worst-case scenarios. By focusing on the optimization of customer value across the entire product lifecycle, the Company has steadily advanced the implementation of its BC strategy. This approach has enabled the Company to successfully establish a differentiated competitive edge, centered on its HPBC 2.0 products and comprehensive scenario-based solutions. The Company has continued to strengthen its efforts at both ends of the smile curve (i.e., product/technology and marketing/delivery/service), actively building a customer-centric agile organization. Its forward-looking BC technology deployment, strong brand presence, extensive channels, flexible globalization strategy, and continuously enhanced operational capabilities have collectively strengthened its resilience during the industry downturn.

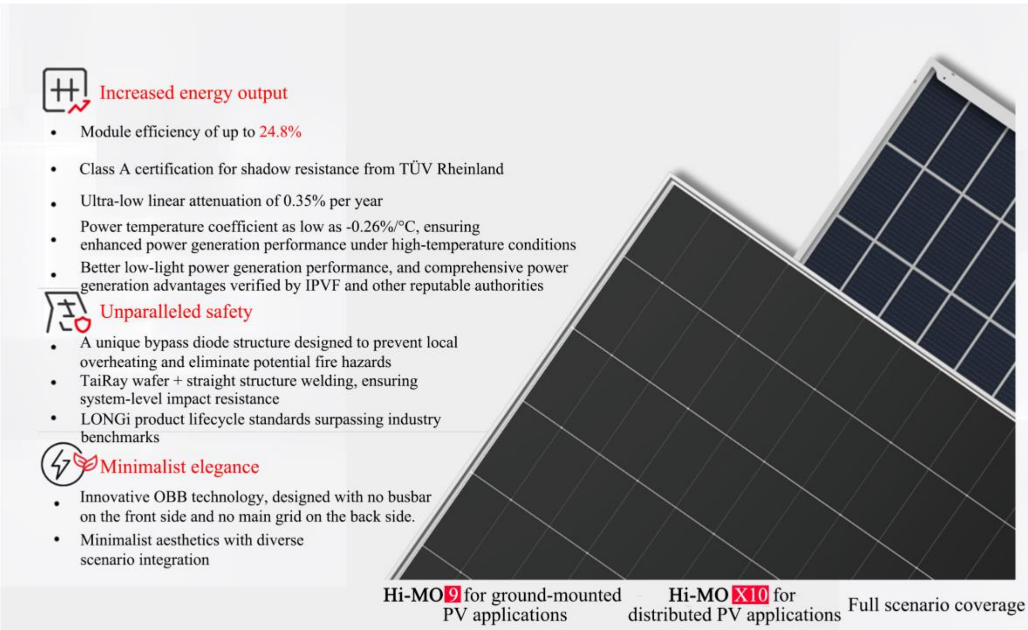
In the first half of 2025, the Company increased its investments in front-line resources and service capabilities with a customer-centric approach. As a result, wafer shipments reached 52.08 GW, with external sales totaling 24.72GW, while cell and module shipments amounted to 41.85 GW, of which 39.57GW were module shipments. However, amid a competitive environment where the sales prices of major PV products fell below the industry's cost threshold, the Company faced operating losses and was unable to translate its increased efforts into revenue growth. During the reporting period, the Company reported operating revenue of RMB 32.813 billion, reflecting a year-on-year decline of 14.83%. The net loss attributable to shareholders of the Company amounted to RMB 2.569 billion, representing a reduction of losses by RMB 2.661 billion compared to the same period last year. This improvement was primarily driven by significant reductions in selling and administrative expenses resulting from enhanced operational efficiencies, as well as a substantial decrease in asset impairment losses.

The main achievements of the Company during the reporting period are described below:

(I) Diversified and upgraded product layout positions BC products as a leader in the high-value segment

As competition in the PV industry gradually transitions from homogeneous price competition to differentiated value competition, the Company has established a high-value product system centered around HPBC 2.0 technology. Additionally, it has developed a comprehensive matrix of "scenario-based + differentiated" product solutions, creating an effective driving force to address the involution competition. During the reporting period, recognition of BC technology surged, accelerating market penetration. The Company's high-value HPBC 2.0 advanced production capacity steadily progressed, with mass-produced modules achieving a conversion efficiency of up to 24.8%. These products have gained widespread popularity in major global markets due to their high efficiency, appealing aesthetics, and safety. The volume of signed orders increased rapidly, with approximately 4 GW shipped in the first half of the year to over 70 countries and regions, including China, Europe, the Asia-Pacific region, Latin America, the Middle East, and Africa. The technological advancements of the Company's products have established a differentiated competitive edge, positioning it as a leader in the high-value market segment. By the end of 2025, the Company expects its high-efficiency HPBC 2.0 cell production capacity to exceed 60% through technological upgrades, positioning it as a leader in product structure upgrades.

HPBC2.0 Technology, Delivering Optimal Lifecycle Value



Targeting the high-end distributed generation market, the Company has successfully developed and mass-produced the innovative hybrid interdigitated back-contact (HIBC) module by integrating high-quality HIT passivation technology with BC processes. For the first time, the module, featuring optimal dimensions of 2,382 mm × 1,134 mm, has achieved power exceeding 700 W and an efficiency of

25.9%, making it the world's most efficient industrial PV product. It also boasts exceptional reliability features such as resistance to water vapor, high temperatures, corrosion, heavy loads, and fire. This innovation has enabled the Company to establish a tiered BC product lineup.

Leveraging advanced BC technology and keen insight into scenario-based product trends, the Company has continuously refined and expanded its scenario-based product matrix to meet customer demands. Notably, the Company has launched a lightweight, low-load module featuring shadow resistance and fire-proof capabilities for distributed solar market, which has gained significant market favor for its leading lightweight design and core safety features. Additionally, the Company has pioneered product solutions for challenging environments, such as deserts, gobi regions, wilderness areas, high-load scenarios, offshore PV installations, and areas prone to dust and snow accumulation. These BC products demonstrate excellent environmental adaptability and structural reliability, effectively addressing specific challenges across various contexts. Moreover, the Company has introduced industrial and commercial rooftop system solutions, including LONGi Roof 5 and Hi ROOF S, equipped with HPBC 2.0 cell technology. It has also introduced the eHome solution featuring PV-storage-charging integration, enabling multi-scenario advancements in PV-building integration.

(II) Seizing global decentralized market opportunities to achieve breakthroughs across multiple market segments

In response to the accelerated evolution of the global economic and trade landscape and the increasingly diversified and fragmented PV market, the Company has demonstrated deep insight and seized market opportunities to build a resilient, customer-centric supply chain and marketing service system. During the reporting period, the Company adopted a customer-focused approach in deploying its resources and capabilities. By aligning its sales strategies with the policy opportunities in the domestic market, the Company achieved a robust year-on-year growth of over 70% in domestic module sales. Internationally, the Company focused on high-value customers and niche markets by implementing a targeted marketing approach tailored to specific customers, scenarios, and market levels. Its position in the European market continued to strengthen, and the Company saw significant growth in high-value segments such as Spain, Australia, and Romania. Notably, the Company achieved the top position (TOP1) in SolarQuotes' semi-annual PV module rankings in Australia. In the wafer sector, the Company rapidly promoted its high-quality TaiRay wafers, achieving a 90% penetration rate for N-type TaiRay wafers in external wafer sales by the end of the reporting period. Furthermore, the Company observed a trend of decentralization in cell manufacturing within the industry, resulting in significant growth in its overseas wafer customer base. In the first half of the year, overseas wafer sales saw a year-on-year increase of over 70%.

(III) Continuously setting new records in cell and module efficiency, establishing competitive barriers through the BC technology ecosystem

Technological innovation serves as the core driving force for enterprises to address the involution competition in the PV industry. During the reporting period, the Company maintained significant investment in R&D, achieving comprehensive breakthroughs in mass production and conversion, technology development, and exploration of cutting-edge areas. In the wafer sector, the TaiRay wafer, powered by the groundbreaking TRCz technology, has seen rapid improvements in yield per unit while maintaining cost leadership and optimized resistivity uniformity. In terms of cells and modules, the mass production yield of HPBC 2.0 cells has reached 97%. Advanced technologies, such as laser graphics, composite passivation, and 0BB, have been successfully applied in mass production, driving cost reductions and efficiency improvements. Furthermore, the developed silver-free metallization and high-density module encapsulation technologies are expected to unlock additional opportunities for progress in this area. As of the end of the reporting period, the Company had secured over 3,500 authorized patents, including 480 patents related to BC cells and modules. This extensive portfolio represents a significant reserve of key technologies and core processes. In areas such as laser graphics, metallization, module welding, and high-transparency encapsulation materials, the Company has developed a collaborative and innovative BC ecosystem that integrates equipment, auxiliary materials, and raw materials. Through a combination of independent innovation, industrial collaboration, patent strategy, and trade secret protection, the Company has established a strong technological barrier in the BC field. During the reporting period, the Company once again set global records for the conversion efficiency of crystalline silicon cells and modules, leveraging its advanced BC technology. The efficiency of BC cells reached 27.81% (certified by the Institute for Solar Energy Research in Hamelin (ISFH)), while the efficiency of BC modules exceeded 26% (certified by the U.S. National Renewable Energy Laboratory (NREL)).

In the field of forward-looking tandem technology, the Company has made continuous progress in the development and commercialization of crystalline silicon-perovskite tandem solar cell technology, achieving and maintaining a world-record efficiency of 34.85% (certified by the NREL). Through material innovation and structural refinement, the Company has achieved a conversion efficiency of 33% for a two-terminal crystalline silicon-perovskite tandem solar cell with an ultra-large size of 260.9 cm^2 (certified by NREL). This achievement marks a significant milestone as the first to reach 33% efficiency in a commercially viable size, setting a new global record for large-area tandem cell efficiency. Since 2024, the Company has served as the first author of five groundbreaking studies on crystalline silicon and tandem cell technologies, published in prestigious international academic journals like *Nature* and *Science*. These achievements have further solidified its position as a leader in cutting-edge technology.

(IV) Digital intelligence fuels advances in lean manufacturing, while operations are optimized to establish a risk mitigation moat

The Company leads the way in advanced manufacturing with the world's first lighthouse + zero-carbon factory in the PV industry. It remains committed to advancing cutting-edge lean manufacturing practices, including equipment automation and intelligent upgrades, end-to-end AI-powered quality inspection and analysis, precise traceability, intelligent warehousing, and full-chain system integration. These efforts have significantly enhanced labor efficiency and quality while significantly shortening order delivery cycles. During the reporting period, the Company's Jiaxing base obtained the national Intelligent Manufacturing Capability Maturity Model (Integration) Level 3 certification, further reinforcing its leadership in the industry's digital and intelligent transformation.

Simultaneously, the Company adheres to "simple, pragmatic, and efficient" operations, actively streamlining administration and refining processes. These efforts have resulted in significant improvements in operational efficiency, with selling and administrative expenses decreasing by 37% and 23% year-on-year, respectively. By focusing on effective coordination across research, production, supply, and sales, the Company has successfully established a high-value commercialization pathway for HPBC 2.0 products, facilitating the agile development and launch of scenario-based products. This strategic approach has also resulted in a year-on-year reduction of 26 days in inventory turnover. Amidst severe challenges, including industry-wide losses and cash flow pressures, the Company has maintained a high safety margin in its financial reserves. As of the end of the reporting period, the Company's asset-liability ratio stood at 60.72%, while its interest-bearing debt ratio was 21.45%. These figures underscore the Company's industry-leading financial health, demonstrating its operational resilience and anti-risk capabilities to navigate business cycles. With its comprehensive strength in product reliability, financial stability, and long-term development potential, the Company secured AAA rating in PV ModuleTech Bankability Ratings by PV Tech for the 22nd consecutive time during the reporting period.

Major changes in the Company's operations during the reporting period, and events that have a significant impact on the Company's operations during the reporting period and are expected to have a significant impact in the future

√ Applicable □ Not Applicable

Please refer to the aforementioned "Discussion and Analysis of Operations" and "(I) Industry Development During the Reporting Period" in Section I for details.

III. Analysis of Core Competitiveness During the Reporting Period

√ Applicable □ Not Applicable

The Company upholds a development philosophy of "being steady, reliable and technology-leading", consistently leading technological breakthroughs and industrial transformation. It maintains significant advantages in technology R&D, advanced lean manufacturing, efficient global operations, robust financial performance, and excellent ESG performance. For further details, please refer to the analysis of core competitiveness in the 2024 Annual Report.

IV. Major Operations During the Reporting Period

(I) Analysis of main business

1. Analysis of changes in relevant items in the financial statements

Unit: Yuan, Currency: RMB

Item	Amount in the Current Period	Amount in the Same Period of the Previous Year	Change (%)
Operating revenue	32,813,146,398.68	38,528,702,860.54	-14.83

Cost of sales	33,080,973,460.60	35,579,171,022.74	-7.02
Selling expenses	838,609,967.22	1,329,358,022.10	-36.92
Administrative expenses	1,342,967,402.60	1,738,404,716.56	-22.75
Financial expenses	-408,815,336.57	-305,384,216.41	N/A
R&D expenses	751,097,037.01	885,184,926.73	-15.15
Net cash flows from operating activities	-484,332,299.83	-6,413,098,864.02	N/A
Net cash flows from investing activities	-4,346,462,801.34	-3,781,643,379.64	N/A
Net cash flows from financing activities	1,036,163,832.37	7,817,485,804.04	-86.75

Reason for changes in operating revenue: price decrease of modules, wafers, and other products.
Reason for changes in cost of sales: a decrease in the manufacturing cost per unit of major products.
Reason for changes in selling expenses: a decrease in warehousing and marketing expenses.
Reason for changes in administrative expenses: a decrease in the number of employees and bonuses.
Reason for changes in financial expenses: an increase in exchange gains due to exchange rate changes.
Reason for changes in R&D expenses: a decrease in the number of employees and bonuses.
Reason for changes in net cash flows from operating activities: a decrease in raw material purchases, employee salary payments, and other outflows.
Reason for changes in net cash flows from investing activities: an increase in outflows due to the acquisition of fixed assets.
Reason for changes in net cash flows from financing activities: a decrease in financing inflows, such as loans, and an increase in outflows due to loan repayments.

(IV) Analysis of investments

1. Overall analysis of external equity investments

√ Applicable □ Not Applicable

1. During the reporting period, the Company focused on establishing a leading competitive edge based on the BC technology platform. It accelerated the upgrade of HPBC 2.0 technology and production capacity while advancing the establishment of a collaborative BC ecosystem. As of the end of the reporting period, the Company's HPBC 2.0 cell production capacity had reached 24 GW. The HPBC 2.0 cell production facilities in Xixian New Area and Tongchuan, Shaanxi Province, commenced operations. The Weibei Project was progressing steadily, and collaborative production initiatives with Yingfa Derui and Pingmei LONGi also began their phased production.

2. As of the end of the reporting period, the Company's balance of long-term equity investments totaled RMB 8.767 billion, reflecting a 0.45% increase compared to the beginning of the year.

S/N	Project	Implementation Entity	Total Investment Approved by the Board of Directors (RMB 100 million)	Project Progress	Source of Funds
1	Heshan Monocrystalline Module Project with Annual Capacity of 10 GW	Heshan LONGi PV	19.99	According to market conditions, the investment capacity has been adjusted to 3 GW, and the project is now operational.	Self-raised funds
2	Tongchuan LONGi 12GW High-efficiency BC Cell Project	Tongchuan LONGi PV	28.77	The project is currently under construction, with the first stage of production capacity already put into operation in the second quarter of 2025.	Self-raised funds + raised funds
3	LONGi Green Energy PV (Xixian New Area) High-efficiency BC Cell Project with Annual Capacity of 12.5 GW (Phase I)	Xixian New Area PV Technology	32.06	The project is currently under construction, with the first stage of production capacity already put into operation in the second quarter of 2025.	Self-raised funds + raised funds

Notes: ① As reviewed and approved by the 5th meeting of the 5th Board of Directors in 2025, the 2024 Annual General Meeting of Shareholders, and the 1st Bondholders' Meeting of 2025 for the "LONGi 22 Convertible Bonds", the Company has revised the use of RMB 1.08 billion in raised funds. These funds raised through convertible bonds in 2021 were originally intended for the Wuhu Monocrystalline Module Project with Annual Capacity of 15 GW (Phase II). Following this adjustment, the raised funds have been reallocated to the construction of the Tongchuan LONGi 12GW High-efficiency Monocrystalline Cell Project. For details, please refer to the relevant announcements released by the Company on May 27, 2025, and July 1, 2025.

② The Company's 2024 sci-tech innovation green corporate bonds publicly issued to professional investors was registered on July 25, 2025 and approved by the China Securities Regulatory Commission. The investment funds for the LONGi Green Energy PV (Xixian New Area) High-efficiency BC Cell Project with Annual Capacity of 12.5 GW (Phase I) will be partially raised through this bond issuance.

③ The total investment shown in the table above represents the project amount (including working capital) approved by the Board of Directors. The actual investment amount may be adjusted based on market conditions.

(1). Derivative investment for hedging purposes during the reporting period

√ Applicable □ Not Applicable

Unit: RMB 10,000, Currency: RMB

Type of Derivative Investment	Initial Investment Amount	Opening Carrying Amount	Gains or Losses from Changes in Fair Value in the Current Period	Cumulative Changes in Fair Value Included in Equity	Purchased Amount During the Reporting Period	Sold Amount During the Reporting Period	Ending Carrying Amount	Proportion of Ending Carrying Amount to the Company's Net Assets at the End of Reporting Period (%)
Commodity futures			1,325.44		7,156.53	2,558.88	1,325.44	0.02
Total			1,325.44		7,156.53	2,558.88	1,325.44	0.02
Accounting policies and specific principles of accounting for hedging business during the reporting period and whether there was any significant change in them compared to the previous reporting period	The hedging business is newly added in the current period. Please refer to V. 39 in Section VIII for specific accounting policies.							
Explanation of actual gains and losses during the reporting period	This period's futures close-out loss totaled RMB 28.3807 million, with RMB 26.2301 million recognized as investment loss and RMB 2.1506 million as fair value change loss.							
Explanation of hedging effectiveness	During this period, the Company's hedging activities primarily mitigated the risk of price fluctuations in anticipated raw material procurement transactions. By purchasing polysilicon futures contracts with matching notional amounts, maturities, and opposite positions, the Company effectively hedged against uncertainty arising from raw material price volatility.							
Source of derivative investment fund	Self-owned funds							
Risk analysis and control measures for positions in derivatives during the reporting period (including but not limited to market risks, liquidity risks, credit risks, operational risks, and legal risks)	To mitigate potential risks arising from raw material price fluctuations on corporate production and operations, fully utilize the hedging function of futures, and reduce the impact of volatility in raw material and product prices on the company's operating performance, the Company has conducted futures hedging activities for certain commodities. The Company has comprehensively assessed and controlled futures investment and position risks, with detailed explanations as follows: 1. Risk analysis of hedging business (1) Market risk: Significant fluctuations in commodity futures markets may lead to price volatility risks, resulting in trading losses. (2) Capital risk: Futures trading is carried out in accordance with the authority stipulated in the Company's relevant systems. When holding a large market reverse position and the futures market price changes dramatically, the Company may be forced to close its position due to failure to replenish margin in time, resulting in actual losses. (3) Counterparty default risk: During the hedging cycle, losses may be caused by counterparty default due to cyclical fluctuations in prices of related raw materials.							

	(4) Operational and technical risks: The abnormal operation of the trading system may be caused by uncontrollable or unpredictable system, network, or communication failures, resulting in delays, interruptions, or data errors in trading instructions, as well as operational errors by operators, which will bring corresponding operational risks. (5) Policy and legal and regulatory risks: Changes in national laws, regulations, policies, amendments to futures exchange rules, or implementation of emergency measures may lead to severe market volatility or trading halts. 2. Risk control measures for hedging business (1) The Company has formulated the *Commodity Futures Hedging Business Management System*, which clearly stipulates the operating principles, approval authority, business processes, risk management and other aspects of futures hedging trading business, and has established a timely reporting system for abnormal situations and risk handling procedures to control trading risks. (2) The Company has established a relatively well-structured futures hedging organization with dedicated professionals in trading, finance, settlement, risk control, and compliance. Relevant staff will receive professional training to strengthen risk management and prevention awareness. (3) The Company will formulate a specific implementation scheme for hedging business according to the actual business situation, so as to ensure that the scale of hedging business matches the Company's operating business, hedging the risk of price fluctuation to the greatest extent. The Company will strictly execute hedging strategies, operate in compliance with regulations, apply for hedging positions promptly, maintain sound position management, and control position and liquidity risks. (4) The Company will establish trading, communication, and information service systems that meet required standards to ensure smooth trading operations. In case of system failures, appropriate measures will be taken promptly to minimize losses. (5) The Company will enhance research and analysis of commodity prices, closely monitor changes in domestic and international markets, and adjust trading strategies promptly. (6) The Company's audit and risk management departments will conduct regular and ad-hoc inspections of the futures hedging activities.
For changes in market prices or fair value of invested derivatives during the reporting period, the analysis of derivative fair value shall disclose the specific valuation methods used and related hypotheses and parameter settings.	The Company recognizes and measures its derivatives in accordance with the Accounting Standards for Business Enterprises. During the reporting period, the fair value change of derivatives recognized amounted to RMB 11.1038 million, of which RMB 13.2544 million pertained to the fair value change of open positions at the end of the period. The fair value of futures contracts is determined based on quoted market prices in the futures exchange.
Involvement in litigation (if applicable)	None.
Disclosure date of the announcement of the Board of Directors for derivative investment approval (if any)	February 15, 2025
If applicable, the date of the shareholders' meeting announcement approving the derivative investment shall be disclosed.	N/A

(2). Derivative investment for speculative purposes during the reporting period

□ Applicable √ Not Applicable

Other descriptions

The 12th meeting of the 5th Board of Directors of the Company in 2024 and the 7th meeting of the 5th Board of Supervisors in 2024 reviewed and approved the *Proposal on Conducting Foreign Exchange Derivatives Trading in 2025*, authorizing the Company and its subsidiaries to engage in foreign exchange derivatives trading business in 2025. The maximum transaction balance at any given time is capped at the equivalent of USD 4 billion, covering the period from January 1, 2025, to December 31, 2025. The Board of Directors of the Company has empowered management to approve applications for foreign exchange derivatives trading business within this limit, based on business conditions and actual needs. For details, please refer to the relevant announcement released by the Company on December 11, 2024.

During the reporting period, the Company did not engage in any relevant foreign exchange derivatives trading.

□ Applicable √ Not Applicable

(VII) Structured entities in the charge of the company

□ Applicable √ Not Applicable

V. Other Disclosures

(I) Possible risks

√ Applicable □ Not Applicable

1. Industry policy risk

The development of the photovoltaic market is highly correlated with new energy policies. Adjustments to energy transition goals or changes in energy policies by various countries can lead to fluctuations in photovoltaic industry policies, potentially causing a slowdown or decline in installation demand. At the same time, with the rapid development of new energy in recent years, some traditional photovoltaic markets have begun to encounter grid acceptance bottlenecks, subsidy reductions, low electricity prices and other problems. The full entry of new energy into the domestic power market will weaken the expected stability of photovoltaic project income in the short term. If there is a lack of policy support, such as adaptive consumption mechanisms, electricity price mechanisms, and grid infrastructure transformation, it will restrict the growth of the regional photovoltaic market and cause periodic demand fluctuations.

The Company will gain deep insights into global photovoltaic industry policy changes to identify opportunities in high-value and emerging markets. It will actively engage in shaping industry policies and standards, while collaborating with stakeholders across the value chain to promote the healthy and sustainable development of the sector.

2. Global operation risk

Amid rising trends of de-globalization and trade protectionism, major global photovoltaic markets are increasingly elevating localization requirements and strengthening trade barriers through measures such as tariffs, anti-dumping and countervailing investigations, and the imposition of green criteria. Frequent and abrupt changes in trade policies—including US AD/CVD cases, reciprocal tariffs, and the OBBB Act—will significantly increase risks for corporate overseas investments and global market expansion. Moreover, global operations may expose the Company to risks such as cultural conflicts, labor disputes, and intellectual property challenges. Inadequate overseas infrastructure and underdeveloped supply chain systems can also hinder operational efficiency. Additionally, fluctuations in the global economic landscape or geopolitical tensions may trigger significant exchange rate volatility, further compounding operational risks.

The Company will closely monitor and analyze global economic and trade trends, develop differentiated localization strategies based on regional trade rules and market demands, actively explore entry models in low-risk regions, continuously improve its overseas risk management framework, strengthen local operational and service capabilities, and prudently utilize financial instruments to mitigate exchange rate risks.

3. Technology iteration risk

The photovoltaic industry is characterized by rapid technological evolution and high investment. TOPCon technology replaced PERC within just two years, BC technology is accelerating its industrialization, and the next-generation perovskite-silicon tandem technology race has already begun. In the face of rapid technological advancements and intense market competition, an enterprise risks being eliminated from the market if it fails to maintain its advantages in technology and advanced production capacity.

Leveraging its industry-leading strengths in mass production iteration and cutting-edge R&D, the Company will rely on independent innovation and industrial collaboration to build on its advantages in second-generation BC products. It will intensify efforts in developing products for differentiated application scenarios, promote the commercialization of advanced perovskite-silicon tandem technology, and continuously enhance product competitiveness by delivering greater customer value.

4. Risk of imbalance between supply and demand in the industry

In recent years, due to the large-scale disorderly expansion of production capacity in the early stage, the photovoltaic industry has shown a serious imbalance between supply and demand in all links of the main industrial chain, and the price of the industrial chain has fallen rapidly below the industry cost line, causing the entire industry to fall into systemic losses. At present, the industry's consensus on "anti-involution" has been formed, and the specific scheme has not yet been issued. The Company may still face operating pressure in the short term.

While improving product competitiveness, the Company will further reduce costs and increase efficiency, improve organizational operating efficiency, and ensure healthy and safe cash reserves and asset structure to strengthen risk resistance.

(II) Other disclosures

√ Applicable □ Not Applicable

Implementation Progress of "Corporate Value and Return Enhancement" Action Plan 2025

The Company actively responded to the Shanghai Stock Exchange's *Initiative on Carrying out a Special Action of "Corporate Value and Return Enhancement" for Shanghai-listed Companies*, and disclosed the *"Corporate Value and Return Enhancement" Action Plan 2025* on the website of the Shanghai Stock Exchange on April 30, 2025. The implementation progress of the "Corporate Value and Return Enhancement" Action Plan during the reporting period is reported as follows:

1. Product leadership shapes differentiated competitiveness, and steady operation improves risk resistance

In the first half of 2025, the Company focused on long-term sustainable development, actively responded to fierce competition in the industry and a rapidly changing market environment, strived to build differentiated competitiveness based on advanced BC technology, and enhanced risk resistance through stable and reliable operations. During the reporting period, the Company's operating results are detailed in "II. Discussion and Analysis on Operations" in this section.

2. Comprehensively optimize corporate governance to promote the Company's sustainable development

During the reporting period, the Company continued to improve the construction of its governance system, implemented the requirements of the new Company Law and supporting rules for listed company supervision, systematically sorted out, revised and formulated nearly 30 corporate governance systems, and ensured efficient corporate governance decision-making, and clear rights and responsibilities. The "one-click" service of the Shanghai Stock Exchange Shareholders' Meeting was enabled to facilitate small and medium-sized investors to participate in shareholders' meetings. The Company further optimized the governance structure, abolished the Supervisory Board, and completed the election of the board of directors, forming a professional and diverse board structure with 3 internal directors, 1 employee director, 1 shareholder director, 1 external director, and 3 independent directors. It actively promoted the in-depth participation of independent directors in corporate governance through various professional committees, pre-meeting communications, and special seminars to ensure efficient and scientific decision-making in corporate governance.

The Company continued to improve its ESG governance level, empowered sustainable development with low-carbon technology, and maintained a leading industry level in authoritative domestic and foreign ESG ratings, such as MSCI, FTSE Russell, Ecovadis, and CSI Index. During the reporting period, its HPBC2.0 module products were certified by China General Certification Center for product carbon footprint bidding documents, filling the domestic practice gap of the latest industry standard (SJ/T 11926-2024) of the Ministry of Industry and Information Technology, and setting an industry benchmark in terms of methodology and data localization. The Company continuously optimized the whole-chain ESG management system, obtained TUV traceability full-chain certification (Level AA, the highest evaluation), and was rated as Level A in CDP's supplier cooperation assessment. Its ESG competitiveness continues to improve.

3. Improve the ability of directors and senior executives, ensuring the "key minority" actively perform their duties

The Company continues to ensure its "key minority" take on their responsibilities, improve the awareness of directors and senior executives on standardized operation and their ability to perform duties efficiently through regulatory training, biweekly capital market reports and other forms to lay a solid foundation for compliance. The Company's "key minority" has taken on real and positive responsibilities. Mr. Zhong Baoshen, Chairman of the Board, and Mr. Li Zhenguo, Founder and President of the Central Research Institute as well as Chief Technology Officer of the Technology Management Center, stood in solidarity with the Company during challenging times and did not receive any remuneration from the Company in the first half of the year. Mr. Zhong Baoshen proactively implemented his share acquisition plan (with a total value of no less than RMB 100 million). As of the end of the reporting period, he had cumulatively purchased an additional 5,403,000 shares of the Company’s stock during the year, with a total investment of RMB 86.9404 million, achieving approximately 87% of the planned acquisition target.

4. Focus on investors and take multiple measures to strengthen investor communication

During the reporting period, the Company actively implemented the "investor-oriented" concept, specially formulated the *Market Value Management System*, incorporated market value management into strategic management, continuously enhanced the effectiveness of information disclosure, and built a transparent, standardized and diverse communication bridge. After the disclosure of the 2024 Annual Report and the Report for First Quarter 2025, the Company quickly organized a performance briefing meeting integrating "live video broadcast, teleconference and text interaction". The Chairman led the management to listen to and respond to investors' concerns. Through various forms, such as brokerage strategy meetings, telephone conferences, on-site surveys, SSE e-interactions, investor hotlines, and collective reception day activities for investors in the jurisdiction, the Company maintained close communication with various types of investors and published 4 copies of the *Investor Relations Activity Record Form* to protect the fair right of all investors to know and enable investors to fully understand the Company's operating dynamics.

Section IV Environmental, Social, and Governance

Description of changes in the Company's directors and senior management

√ Applicable □ Not Applicable

1. On May 23, 2025, the Board of Directors received a written Resignation Report submitted by Mr. Li Zhenguo, who will focus on R&D and scientific and technological management of the Company and apply for resignation as Director, General Manager and Legal Representative of the Company. According to the relevant provisions of the Company Law and the *Articles of Association*, the above resignation shall take effect from the date of delivery to the Board of Directors. On May 26, 2025, the Company held the 5th Meeting of the 5th Board of Directors in 2025 and reviewed and approved the *Proposal on Appointment of General Manager of the Company*. It was agreed to appoint Mr. Zhong Baoshen, Chairman of the Board of Directors, as the General Manager of the Company concurrently.

2. During the reporting period, the Company completed the general election of the Board of Directors. Following review and approval at the 5th meeting of the 5th Board of Directors in 2025, and subsequent election at the 2024 Annual General Meeting of Shareholders, the 6th Board of Directors was constituted. The new Board consists of 9 directors: 5 non-independent directors (Zhong Baoshen, Liu Xuewen, Tian Ye, Yin Jian'an, and Li Shuxuan), 1 employee director (Bai Zhongxue), and 3 independent directors (Lu Yi, Li Meicheng, and Zhou Zhe). Among these members, Yin Jian'an, Li Shuxuan, and Zhou Zhe are newly elected to the Board.

II. Profit Distribution Plan or Capital Reserve Capitalization Plan

V. Consolidating and Expanding the Achievements of Poverty Alleviation and Rural Revitalization

√ Applicable □ Not Applicable

The Company continues to respond to the national rural revitalization strategy. During the reporting period, the Company continued to promote the "photovoltaic+" project in thousands of villages and households in Shaanxi Province, empowering rural revitalization and development through green electricity. At the same time, the Company actively fulfills its social responsibilities. Its subsidiary LONGi Solar made a donation to the Red Cross Society of Jingtai County, Gansu Province for infrastructure construction. Additionally, the company donated 420kW of photovoltaic modules to Longhuai Village, Lingyun County, Guangxi, to assist in the construction of a village-level photovoltaic power station, thereby creating a new source of collective income for the village.

Section V Significant Events

I. Performance of Commitments

(I) Commitments of the actual controller, shareholders, related parties, acquirers of the Company, the Company itself, and other stakeholders during the reporting period or continuing into the reporting period

√ Applicable □ Not Applicable

Notes: ① I will take legal and effective measures to ensure that other companies, enterprises, and economic organizations under my control, as well as my affiliated companies, do not engage, directly or indirectly, in any business that is the same as or similar to the Company's business and constitutes or may constitute competition with the Company's operations. Furthermore, I guarantee not to engage in any activities that could harm the legitimate rights and interests of the Company and its other shareholders.

② I will strictly adhere to the provisions of the *Company Law*, the *Articles of Association*, the *Related Party Transaction System*, the *Rules of Procedure for the Shareholders' Meeting*, and the *Rules of Procedure for the Board of Directors*. I will take steps to avoid and minimize related party transactions, consciously safeguarding the interests of the Company and all shareholders. I will not use my shareholder status in the Company to seek improper benefits in related party transactions. If the Company must engage in a related party transaction with an entity under my control, I commit to strictly adhering to relevant legal procedures and the rule of fair trade. I will ensure that the transaction's price, agreement terms, and conditions are fair and reasonable. Additionally, I will not request the Company to offer more favorable terms than those available to third parties.

③ I hereby undertake that I am the person acting in concert.

④ I undertake that I am the person acting in concert with the controlling shareholders and actual controllers, Mr. Li Zhenguo and Ms. Li Xiyan.

II. Non-operational Use of Funds by the Controlling Shareholder or Other Related Parties During the Reporting Period

1. Matters disclosed in temporary announcements and without progress or changes in subsequent implementation

□ Applicable √ Not Applicable

2. Matters disclosed in temporary announcements but with progress or changes in subsequent implementation

√ Applicable □ Not Applicable

(1) Estimated signing of daily related party transaction contracts (contract amount)

According to the Company's business plan, the *Proposal on Estimated Daily Related Party Transactions in 2025* was reviewed and approved at the 12th meeting of the 5th Board of Directors of the Company in 2024, which estimated the signing of daily related party transaction contracts between the Company and its subsidiaries and Dalian Linton NC Machine Co., Ltd. (hereinafter referred to as "Linton NC"), LONGi Magnet Co., Ltd. (hereinafter referred to as "LONGi Magnet") and other related parties in

2025 (For details, please refer to the relevant announcement released by the Company on December 11, 2024). On March 21, 2025, CENTER INT became a related party of the Company. Since then, the two enterprises have established long-term strategic cooperation in the BIPV business. The *Proposal on Increasing Estimated Daily Related Party Transactions in 2025* was reviewed and approved at the 2024 Annual Meeting of the 5th Board of Directors, which estimated the contract amount of daily related party transactions between the Company and its subsidiaries and CENTER INT and its subsidiaries from March 21, 2025 to December 31, 2025 (For details, please refer to the relevant announcement released by the Company on April 30, 2025). During the reporting period, the Company executed the following daily related party transaction contracts:

Unit: RMB 10,000, Currency: RMB

Type of Related Party Transaction	Related Party		Content of Related Party Transaction	Estimated Amount of Related Party Transaction Contracts in 2025 (tax inclusive)	Amount of Related Party Transaction Contracts Signed in the First Half of 2025 (tax inclusive)
Purchase of goods and services	Dalian Linton NC Machine Co., Ltd. and its subsidiaries	Dalian Linton NC Machine Co., Ltd.	Equipment, spare parts, and supporting services	31,847	9,429.59
		Zhejiang Chuanhe New Materials Co., Ltd.	Production materials	107,800	36,862.31
		Other subsidiaries of Dalian Linton NC Machine Co., Ltd.	Equipment, spare parts, and supporting services	52,287	27,996.91
		Subtotal		191,934	74,288.81
	LONGi Magnet		Spare parts and supporting services	7	1.17
	CENTER INT and its subsidiaries		Receipt of services	3,000	230.21
Sales of products or auxiliary materials	Dalian Linton NC Machine Co., Ltd. and its subsidiaries		Sales of products or auxiliary materials	500	171.40
	CENTER INT and its subsidiaries		Sales of products or auxiliary materials	61,558	25,824.96
			Provision of services	0	3.91
Total				256,999	100,520.45

Notes: ① The tail difference is a result of rounding. According to the S*tock Listing Rules of the Shanghai Stock Exchange*, the amount of related party transactions listed above does not include transactions with associates.

② The estimated contract amount period of related-party transactions between the Company and its subsidiaries and CENTER INT and its subsidiaries is from March 21, 2025 to December 31, 2025, and the remaining related parties are for the whole year of 2025.

Other descriptions

√ Applicable □ Not Applicable

① In the "Source of Raised Funds" column, "Others" refer to publicly issued securities from a rights issue.

② There are no extra raised funds related to the amounts listed above for the Company.

③ Due to the allocation of surplus funds from certain completed projects of the Company to new projects and to supplement working capital, the total planned investment amount of the raised funds in the list of investment projects financed by raised funds reflects the adjusted total investment amount. This figure differs from the net proceeds of raised funds after deducting issuance expenses, as shown in the table above.

Wuhu Monocrystalline Module Project with Annual Capacity of 15 GW (Phase II)	May 27, 2025	Cancellation of the project	108,000.00	0	Tongchuan LONGi High-efficiency Monocrystalline Cell Project with Annual Capacity of 12 GW	Considering that the funds raised for the Wuhu Monocrystalline Module Project with Annual Capacity of 15 GW (Phase II) have not yet been utilized, and in light of the maturation of the Company's BC cell technology commercialization and mass production, it has become necessary to further accelerate the development of advanced BC cell production capacity and strengthen the Company's leadership in this area. After a careful evaluation of the capacity ratios of cells and modules, the construction schedule of the Tongchuan LONGi 12GW High-efficiency Monocrystalline Cell Project, and the size of the raised funds, the Company has decided to reallocate RMB 1.08 billion, initially designated for the Wuhu Monocrystalline Module Project with Annual Capacity of 15 GW (Phase II), to the Tongchuan LONGi 12GW High-efficiency Monocrystalline Cell Project.	0	This change has been deliberated and approved by the 5th meeting of the 5th Board of Directors in 2025, the 2nd meeting of the 5th Board of Supervisors in 2025, the Annual General Meeting of Shareholders in 2024 and the 1st Bondholders' Meeting in 2025 for the Public Offering of Convertible Corporate Bonds in 2021. For details, please refer to the relevant announcements released by the Company on May 27 and July 1, 2025.

2. Description of changes in shares

√ Applicable □ Not Applicable

The convertible corporate bond "LONGi 22 Convertible Bonds", publicly issued by the Company, entered its conversion period on July 11, 2022. During the reporting period, a total of 2,242 shares were converted (for details, please refer to the relevant announcements released by the Company on April 2 and July 2, 2025).

3. Impact of changes in shares from the end of the reporting period to the disclosure date of the semi-annual report on earnings per share, net asset value per share, and other financial indicators (if any)

√ Applicable □ Not Applicable

During the reporting period, the Company experienced changes in its shares due to the conversion of the "LONGi 22 Convertible Bonds". Given the relatively small number of shares converted, the impact on key financial indicators, such as earnings per share and net assets per share, was minimal.

4. Other information deemed necessary by the Company or required by the securities regulatory authority for disclosure

Latest conversion price as of the end of the reporting period		RMB 17.50 per share		

(VI) The Company's liabilities, changes in credit, and cash arrangements for future repayment

As of the end of the reporting period, the asset-liability ratio in the Company's consolidated financial statements was 60.72%, reflecting a reasonable structure of assets and liabilities. On June 25, 2025, China Lianhe Credit Rating Co., Ltd. issued the *2025 Tracking Rating Report on the Convertible Corporate*

Bonds issued by LONGi Green Energy Technology Co., Ltd., which assessed and rated the credit status of the Company's "LONGi 22 Convertible Bonds". According to the report, the Company's long-term credit rating was reaffirmed as AAA, and the credit rating of "LONGi 22 Convertible Bonds" was also maintained at AAA, with a stable rating outlook. For details, please refer to the relevant announcement released by the Company on June 26, 2025.

As of the end of the reporting period, the Company's main business remained stable, demonstrating a sound financial position and robust solvency.

(VII) Other information of convertible bonds

On January 6, 2025, the Company paid the interest on the "LONGi 22 Convertible Bonds" for the period from January 5, 2024, to January 4, 2025, at a coupon rate of 0.8% (tax inclusive). This means that each convertible bond with a par value of RMB 100 has an interest payment of RMB 0.80 (tax inclusive) (for details, please refer to the *Announcement on the Interest Payment for the "LONGi 22 Convertible Bonds"* released by the Company on December 30, 2024).

III. Company Profile

1. Company profile

√ Applicable □ Not Applicable

LONGi Green Energy Technology Co., Ltd. (hereinafter referred to as "the Company") was established on February 14, 2000, with its registered address at No. 388, Middle Aerospace Rd, Xi'an City, Shaanxi Province. The Company was listed on the Shanghai Stock Exchange on April 11, 2012. As of June 30, 2025, the Company's total share capital amounted to RMB 7,578,050,192.00, with each share having a par value of RMB 1.

The Company and its subsidiaries (hereinafter referred to as "the Group") operate within the PV industry. The Group's primary business activities include the research and development, manufacturing, and sales of monocrystalline ingots, wafers, cells, and modules, as well as the development and operation of PV power stations.

The financial statements were approved for issue by the Board of Directors of the Company on August 22, 2025.

IV. Preparation Basis of Financial Statements

1. Preparation basis

The financial statements were prepared in accordance with the *Accounting Standards for Business Enterprises—Basic Standards*, specific accounting standards, and relevant provisions (collectively referred to as "Accounting Standards for Business Enterprises") issued by the Ministry of Finance of China on or after February 15, 2006, as well as the disclosure regulations outlined in the *Preparation Rules No. 15 for Information Disclosure of Companies Offering Securities to the Public—General Provisions on Financial Reports* issued by the China Securities Regulatory Commission (CSRC).

2. Going Concern

√ Applicable □ Not Applicable

The financial statements are prepared on the basis of going concern.

V. Significant Accounting Policies and Accounting Estimates

Notes to specific accounting policies and accounting estimates:

√ Applicable □ Not Applicable

The Group determines specific accounting policies and accounting estimates based on the characteristics of production and operation. These policies and estimates are primarily reflected in several areas, including the measurement of expected credit losses of accounts receivable and contract assets (refer to "V. 11. Financial instruments" for details), valuation methods of inventories (refer to "V. 16. Inventories"), measurement model for investment properties (refer to "V. 20. Investment properties), depreciation for fixed assets, and amortization of intangible assets and right-of-use assets (refer to "V. 21.

Fixed assets", "V. 26. Intangible assets", and "V. 38. Leases"), impairment of long-term assets (refer to "V. 27. Impairment of long-term assets"), and the timing of revenue recognition (refer to "V. 34. Revenue").

For details regarding the key judgments, important accounting estimates, and key assumptions employed by the Group in formulating its important accounting policies, please refer to "Significant accounting estimation and judgment" under "V. 41. Others".

1. Statement of compliance with the Accounting Standards for Business Enterprises

The financial statements of the Company are prepared in accordance with the requirements of the Accounting Standards for Business Enterprises, and truly and fully present the information such as the financial position, business performance, changes in shareholders' equity and cash flows of the Company.

2. Accounting period

The Company's accounting year starts on January 1 and ends on December 31 on the Gregorian calendar.

3. Business cycle

√ Applicable □ Not Applicable

The normal business cycle refers to the period from the time when the Company buys assets for processing to the time when such assets become cash or cash equivalents. For the Company, a business cycle is 12 months and it is regarded as a classification criterion for the liquidity of assets and liabilities.

4. Recording currency

The Company's recording currency is Renminbi (RMB). The Company's subsidiaries determine their recording currencies based on the primary economic environment in which they operate. For the following overseas subsidiaries, the recording currencies are USD, JPY, EUR, INR, THB, AUD, AED, and IDR, respectively: EZ International Limited, LONGi MALAYSIA SDN. BHD., LONGi TECHNOLOGY (KUCHING) SDN. BHD., LONGi Solar Technology (U.S.) INC., VINA SOLAR TECHNOLOGY CO., LTD., VINA CELL TECHNOLOGY CO., LTD., LONGi SOLAR TECHNOLOGY (H.K.) LIMITED, Value-add Investment (U.S.) LLC, Evergreen Investment (U.S.) Inc., LONGi Solar Technology (Canada) Inc., NWestern Solar VIETNAM COMPANY LIMITED, LONGi Solar Technology K.K., LONGi Solar Technologie GmbH, LONGi (Netherlands) Trading B.V., LONGi SOLAR TECHNOLOGY SPAIN, S.L.U., LONGi SOLAR FRANCE SARL, LONGi Solar Poland Sp. z o. o., LERRI SOLAR TECHNOLOGY (INDIA) PRIVATE LIMITED, LONGi SOLAR TECHNOLOGY (INDIA) PRIVATE LIMITED, LONGi NEW ENERGY (THAILAND) CO., LTD., LONGi Solar Australia Pty Ltd., LONGi Solar Technology DMCC, PT FUTURE SOLAR TECH ENERGY, and PT LONGI SOLAR TECHNOLOGY INDONESIA. The financial statements are presented in RMB.

5. Method and basis for determination of materiality

√ Applicable □ Not Applicable

Item	Materiality Criteria
Significant accounts receivable with provision for bad debts made on an individual basis	The single amount exceeds RMB 10 million.
Recovery or reversal of provision for bad debts for significant accounts receivable and contract assets	The single amount exceeds RMB 10 million.
Recovery or reversal of provision for bad debts for significant other accounts receivable	The single amount exceeds RMB 5 million.
Write-off of significant accounts receivable	The single amount exceeds RMB 20 million.
Significant construction in progress	The individual budget accounts for more than 1% of the latest net assets and exceeds RMB 100 million.
Significant contract liabilities and advances from customers with aging over one year	The amount of individual contract liabilities and advances from customer accounts for more than 5% of the total contract liabilities and advances from customers and exceeds RMB 50 million.
Significant change in the carrying amount of contract liabilities	The change in the carrying amount of similar contract liabilities accounts for more than 2% of the total revenue from the previous year and exceeds RMB 100 million.
Significant accounts payable and other payables aged over one year or overdue	The overdue amount of a single item accounts for more than 5% of the total payables and exceeds RMB 50 million.
Significant provisions	The amount of individual provisions accounts for more than 5% of the total provisions and exceeds RMB 50 million.
Significant investing activities	A single investing activity accounts for more than 10% of the total cash inflows or outflows related to investing activities, and the amount is greater than RMB 50 million.
Important holding subsidiaries	The total assets, net assets, total revenue, operating profit, and net profit or loss exceed 10% of the Group's corresponding financial indicators.
Significant joint ventures or associates	The carrying amount of long-term equity investment in a single investee accounts for more than 0.5% of the total assets and exceeds RMB 200 million.
Significant commitments	The single capital expenditure commitment accounts for more than 1% of the latest net assets and exceeds RMB 100 million.
Significant contingencies	The amount of expected loss resulting from a single event accounts for more than 1% of the latest net assets and exceeds RMB 100 million.
Significant subsequent events	Stock and bond issuance; the amount involved in a single event accounts for more than 1% of the latest net assets and exceeds RMB 100 million.

6. Accounting treatment methods for business combination under common control and not under common control

√ Applicable □ Not Applicable

If the Group gains control over one or more entities (or a group of assets or net assets) that constitute a business, the transaction or event is classified as a business combination. The business combination includes business combination under common control and business combination not under common control.

For transactions not under common control, the acquirer will evaluate whether to apply the simplified judgment approach known as the "concentration test" to determine if the acquired asset portfolio constitutes a business. If the portfolio passes the concentration test, it will be determined not to constitute a business. Conversely, if the portfolio fails the concentration test, it must still be assessed based on business criteria.

When the Group acquires a group of assets or net assets that do not constitute a business, the purchase cost shall be allocated based on the relative fair value of each identifiable asset and liability acquired on the acquisition date. In such cases, the following accounting treatment methods for business combinations do not apply.

(1) Business combination under common control

If all enterprises involved in a combination are under the ultimate control of one or several same parties before and after the combination, and such control is not temporary, it is a business combination under common control. The assets and liabilities acquired by the combining party in a business combination shall be measured at the carrying amount in the consolidated financial statements of the ultimate controlling party on the combination date. The difference between the carrying amount of the net assets acquired and the carrying amount of the consideration paid for the combination (or the total par value of the shares issued) shall be treated as an adjustment to the share premium in the capital reserve. If the share premium in the capital reserve is not sufficient to absorb the difference, surplus reserve and undistributed profits shall be offset in order. The directly related expenses incurred for business combination shall be included in the current profit and loss when incurred. The combination date refers to the date on which the combining party actually gains control over the combined party.

(2) Business combination not under common control

If all parties involved in a combination are not under the ultimate control of one or several same parties before and after the combination, the combination is a business combination not under common control. As the acquirer, the Group calculates the difference between the sum of the fair value on the acquisition date of the assets paid (including any equity interests in the acquiree held prior to the acquisition date), liabilities incurred or assumed, and the fair value of any issued equity securities used to gain control over the acquiree, and the fair value of the identifiable net assets obtained during the business combination. After considering the impact of any relevant deferred taxes, if the difference is positive, it will be recognized as goodwill; if negative, it will be included in current profit and loss. The transaction expenses of equity securities or debt securities issued as consideration paid for the combination by the Group shall be included in the initially recognized amount of the equity securities or debt securities. Other direct costs incurred by the Group for the business combination shall be included in the current profit and loss. On the acquisition date, the Group recognizes at fair value the identifiable assets, liabilities, and contingent liabilities of the acquiree that satisfy the recognition conditions. The acquisition date refers to the date on which the acquirer actually gains control over the acquiree.

7. Determination of control and preparation of consolidated financial statements

√ Applicable □ Not Applicable

(1) General principles

The consolidation scope of consolidated financial statements is determined on the basis of control, including the Company and subsidiaries controlled by the Company. Control means the power of the Group over the investee, and the investor can enjoy variable returns through participating in related activities of the investee and is able to influence its amount of return with the power over the investee. The financial status, operating results, and cash flow of subsidiaries shall be included in the consolidated financial statements from the start date of control to the end date of control.

All internal transactions and balances of the Group at the time of consolidation, including unrealized profits and losses arising from internal transactions, are offset. For the unrealized loss incurred in the internal transactions of the Group, if there is evidence indicating that such loss is an impairment loss of the underlying asset, such loss shall be recognized as loss in full amount.

(2) Subsidiaries acquired by combination

For subsidiaries acquired through business combinations under common control, the carrying amounts of the assets and liabilities of the acquired subsidiaries, as reflected in the financial statements of the ultimate controlling party, shall be used as the basis during the preparation of the consolidated financial statements for the current period. In such cases, the acquired subsidiaries shall be deemed to be included in the consolidation scope of the Company at the time the Company's ultimate controlling party begins to control them. As a result, the opening balance of the consolidated financial statements, as well as the comparative statements of the previous period, shall be adjusted accordingly.

For subsidiaries acquired through business combinations not under common control, the acquired subsidiaries shall be included in the consolidation scope of the Company from the acquisition date during the preparation of the consolidated financial statements for the current period. This inclusion shall be based on the fair value of the identifiable assets and liabilities of the acquired subsidiaries recognized on the acquisition date.

(3) Disposal of subsidiaries

When the Company loses control over its original subsidiary, any resulting disposal gain or loss shall be included in the investment income for the period in which control is lost. For remaining equity investments, the Group re-measures them at fair value on the date of loss of control. Any resulting gain or loss is also included in the investment income for the period in which control is lost.

(4) Changes in minority interest

The following differences shall be treated as adjustments to the capital reserve (share premium) in the consolidated balance sheet: difference between the costs of long-term equity investments newly acquired through the purchase of minority interest and the share of net assets enjoyed in the subsidiary calculated according to the newly increased shareholding proportion; and the difference between the disposal price obtained from partial disposal of the equity investment in the subsidiary without losing control and the net assets enjoyed in the subsidiary corresponding to the disposal of long-term equity investments. If the capital reserve (share premium) is not sufficient to absorb these differences, surplus reserve and undistributed profits shall be offset in order.

8. Classification of joint arrangements and accounting treatment methods for joint operations

□ Applicable √ Not Applicable

9. Recognition criteria of cash and cash equivalents

Cash equivalents represent the Company's short-term (generally maturing within three months from the date of purchase) and highly liquid investments that are readily convertible to cash with known amounts and subject to an insignificant risk of changes in value.

10. Foreign currency transactions and translation of foreign currency statements

√ Applicable □ Not Applicable

(a) Foreign currency transaction

When the Group receives capital contributions in foreign currency from an investor, it converts the contributions into RMB using the spot exchange rate on the date of receipt. Other foreign currency transactions shall be translated into RMB using the spot exchange rate on the transaction date during initial recognition.

On the balance sheet date, foreign currency monetary items shall be translated using the spot exchange rate on that date. Except for exchange differences arising from the principal and interest of special borrowings related to the acquisition, construction, or production of assets eligible for capitalization (see Note V. 23), all other exchange differences shall be included in the current profit and loss. Foreign currency non-monetary items measured at historical cost shall still be translated using the spot exchange rate on the transaction date. Foreign currency non-monetary items measured at fair value are converted at the spot exchange rate on the date when the fair value is determined. The resulting exchange differences are included in other comprehensive income if they belong to the differences of investments in equity instruments at fair value through other comprehensive income. All other differences are included in the current profit and loss.

When translating the financial statements of overseas operations, assets and liabilities in the balance sheet shall be translated using the spot exchange rate on the balance sheet date. For shareholders' equity items, except for translation differences of foreign currency financial statements in undistributed profits and other comprehensive income, all other items shall be translated using the spot exchange rate at the time of their occurrence. Income and expense items in the income statement shall be translated using the spot exchange rate on the transaction date. The translation differences of foreign currency financial statements arising from the above-mentioned translations shall be presented under other comprehensive income. For the disposal of overseas operations, the relevant translation differences of foreign currency financial statements shall be reclassified from other comprehensive income to the current profit and loss upon disposal.

11. Financial instruments

√ Applicable □ Not Applicable

The Group's financial instruments include cash at bank and on hand, equity investments other than long-term equity investments (see Note V. 19), receivables, payables, borrowings, bonds payable, and share capital.

(1) Recognition and initial measurement of financial assets and financial liabilities

Financial assets and financial liabilities shall be recognized on the balance sheet when the Group becomes a party to the contractual provisions of relevant financial instruments.

Upon initial recognition, financial assets and financial liabilities shall be measured at fair value. For financial assets or financial liabilities at fair value through profit or loss, the related transaction costs shall be directly included in the current profit and loss; for other financial assets or financial liabilities, the related transaction costs shall be included in their initially recognized amounts. For accounts receivable that do not contain significant financing components or where the financing component in contracts of less than one year is not considered, the Group initially measures them at the transaction price determined according to the accounting policies outlined in Note V. 34.

(2) Classification and subsequent measurement of financial assets

(a) Classification of the Group's financial assets

According to the business mode of financial assets management and the contractual cash flow characteristics of financial assets, the Group usually classifies the financial assets into different categories at initial recognition: financial assets measured at amortized cost, financial assets at fair value through other comprehensive income (FVTOCI), and financial assets at fair value through profit or loss (FVTPL).

Financial assets shall not be reclassified after initial recognition unless the Group changes its business mode for managing financial assets, in which case all affected related financial assets shall be reclassified on the first day of the first reporting period following the change in the business mode.

The Group classifies the financial assets that meet all of the following conditions and are not designated to be measured at fair value through profit or loss as those measured at amortized cost:

- The business model of the Group to manage such financial assets is aimed at collecting contractual cash flows;

- The contract terms of the financial assets stipulate that cash flows generated on a specific date are only payments of principal and interest based on the outstanding principal amount.

The Group classifies the financial assets that meet all of the following conditions and are not designated to be measured at fair value through profit or loss as those measured at fair value through other comprehensive income:

- The Group manages the financial assets in a business model that aims at both collecting contractual cash flows and selling the financial assets;

- The contract terms of the financial assets stipulate that cash flows generated on a specific date are only payments of principal and interest based on the outstanding principal amount.

The Group may irrevocably designate, at the initial recognition, the investments in non-trading equity instruments as financial assets at fair value through other comprehensive income. Such designation shall be made on the basis of individual investment, and such investment must conform to the definition of equity instrument from the issuer's point of view.

Except for the above financial assets measured at amortized cost and at fair value through other comprehensive income, the Group classifies all other financial assets as financial assets at fair value through profit or loss.

The business model of managing financial assets refers to how the Group manages financial assets to generate cash flows. The business model determines the cash flow source of the financial assets managed by the Group, which may be the collection of contractual cash flows, the sale of financial assets, or both. The Group determines the business model for managing financial assets based on objective facts and the specific business objectives for managing financial assets decided by key management personnel.

The Group evaluates the contractual cash flow characteristics of financial assets to determine whether the contractual cash flows generated by relevant financial assets on a specific date is only to pay the principal and interest based on the outstanding principal amount. In this context, principal refers to the fair value of financial assets at initial recognition; interest includes consideration for the time value of money, credit risk associated with the amount of principal outstanding over a specific period, and other fundamental borrowing risks, costs, and profits. In addition, the Group evaluates the contract terms which may lead to changes in the time distribution or amount of contractual cash flows of financial assets in order to determine whether they meet requirements of the above contractual cash flow characteristics.

(b) Subsequent measurement for the Group's financial assets

- Financial assets at fair value through profit or loss

Such financial assets are subsequently measured at fair value after initial recognition, and the resulting gains or losses (including interest and dividend income) are included in current profit and loss unless the financial assets are part of the hedging relationship.

- Financial assets measured at amortized cost

After initial recognition, such financial assets are measured at amortized cost using the effective interest method. Any gains or losses on financial assets at amortized cost that are not part of the hedging relationship are charged to the current profit and loss at derecognition, amortization using the effective interest method, or recognition of impairment.

- Debt investments measured at fair value through other comprehensive income

After initial recognition, such financial assets are subsequently measured at fair value. Interest, impairment losses or gains, and exchange gains and losses calculated by the effective interest method are included in the current profit and loss, and other gains or losses are included in other comprehensive income. At derecognition, cumulative gains or losses previously charged to other comprehensive income are transferred from other comprehensive income and charged to the current profit and loss.

- Investments in equity instruments measured at fair value through other comprehensive income

After initial recognition, such financial assets are subsequently measured at fair value. Dividend income is recognized in profit or loss and other gains or losses are recognized in other comprehensive income. Upon derecognition, the accumulated gains or losses previously included in other comprehensive income are transferred out of other comprehensive income and included in retained earnings.

(3) Classification and subsequent measurement of financial liabilities

The Group classifies financial liabilities as financial liabilities at fair value through profit or loss and financial liabilities measured at amortized cost.

- Financial liabilities at fair value through profit or loss

These financial liabilities include financial liabilities held for trading (including derivative instruments belonging to financial liabilities) and designated financial liabilities at fair value through profit or loss.

After the initial recognition, such financial liabilities are subsequently measured at fair value. Except for those related to hedge accounting, the gains or losses arising therefrom are included in the current profit and loss.

- Financial guarantee liabilities

A financial guarantee contract refers to a contract that requires the Group to pay a specific amount to the contract holder who suffers losses when a specific debtor fails to repay the debt in accordance with the original or modified terms of the debt instrument.

After initial recognition, gains related to the financial guarantee contracts is amortized according to the accounting policies described in "Note V. 34" and included in the current profit and loss. Liabilities under financial guarantee contracts shall be subsequently measured at the higher of the loss provision amount determined in accordance with the impairment principle of financial instruments (see Note V. 11(6)) and the balance of the initially recognized amount less the accumulated amortization of the gains related to the financial guarantee contracts.

- Financial liabilities measured at amortized cost

After initial recognition, such financial liabilities are measured at amortized cost using the effective interest method.

(4) Offset

In the balance sheet, financial assets and financial liabilities are shown separately without offsetting each other. However, if the following conditions are met at the same time, the amount after offset will be listed in the balance sheet:

- The Group has the legal right to offset the recognized amount and such a legal right is currently enforceable;

- The Group plans to conduct net settlement or cash out the financial assets and pay off the financial liabilities.

(5) Derecognition of financial assets and financial liabilities

The financial assets shall be derecognized in any of the following conditions:

- The contractual right for collecting cash flows of the financial assets is terminated;

- The financial assets and almost all risks and rewards from the ownership of the financial assets have been transferred to the transferee by the Group;

- Where the financial assets have been transferred, although the Group has neither transferred nor retained almost all risks and rewards of ownership of financial assets, the Group has not retained the control of the financial assets.

If the entire transfer of financial assets meets the derecognition conditions, the difference between the following two amounts shall be included in the current profit and loss by the Group;

- The carrying amount of the transferred financial assets on the date of derecognition;

- The consideration received due to the transfer of financial assets, and the amount corresponding to the derecognized part of the cumulative amount of changes in fair value originally included in other comprehensive income (the financial assets involved in the transfer are debt investments at fair value through other comprehensive income).

If the current obligation of financial liabilities (or part of them) has been released, the Group will derecognize the financial liabilities (or part of them).

(6) Impairment

The Group carries out impairment accounting treatment and recognizes the loss provision for the following items on the basis of expected credit losses:

- Financial assets measured at amortized cost;
- Contract assets;
- Financial guarantee liabilities;
- Finance lease receivables
- Debt investments at fair value through other comprehensive income.

Measurement of expected credit loss

The expected credit loss refers to the weighted average of the credit losses of financial instruments that are weighted by the risk of default. Credit loss refers to the difference between all contractual cash flows receivable according to the contract and discounted according to the original effective interest rate and all expected cash flows receivable, that is, the present value of all cash shortages of the Group.

When measuring the expected credit loss, the longest term that the Group needs to consider is the longest term of the contract (including the option to renew the contract) for which the enterprise faces credit risks.

The expected credit loss during the whole duration refers to the expected credit loss caused by all possible default events of financial instruments during the whole expected duration.

The expected credit loss in the next 12 months refers to the expected credit loss caused by the possible default events of financial instruments within 12 months (or, the expected duration, if the expected duration of financial instruments is less than 12 months) after the balance sheet date, which is part of the expected credit loss in the whole duration.

For notes receivable, accounts receivable, receivables financing, and contract assets arising from routine operating activities such as the sale of goods and rendering of services, the Group consistently measures the loss provision at an amount equivalent to the expected credit losses over the entire duration. The Group calculates the expected credit loss of the above-mentioned financial assets based on historical credit loss experience using a provision matrix. Relevant historical experience is adjusted according to the specific factors of the debtor on the balance sheet date and the evaluation of the current situation and future economic situation forecast.

Except for notes receivable, accounts receivable, receivables financing, and contract assets, the Group measures its loss provision for financial instruments that meet the following conditions based on the amount of the expected credit loss in the next 12 months, and measures its loss provision for other financial instruments based on the amount equivalent to the expected credit loss over the entire duration:

- The financial instrument has only a rather low credit risk on the balance sheet date; or

- The credit risk of the financial instrument has not significantly increased since the initial recognition.

Provision for bad debts of receivables

(a) Portfolio category and determination basis of provision for bad debts by portfolio of credit risk features

Notes receivable	Based on the different credit risk features of acceptors, the Group classifies notes receivable into two portfolios: bank acceptance notes and commercial acceptance notes.
Accounts receivable	Based on the nature of accounts receivable and the credit risk features of various counterparties, the Group classifies accounts receivable into three portfolios: receivables from related parties within the Group, receivables of electricity tariff from customers, and receivables from other customers.
Receivables financing	The Group's receivables financing consists of bank acceptance notes with dual holding purpose. Due to the high credit ratings of accepting banks, the Group treats the entirety of its receivables financing as a single portfolio.
Other receivables	Based on the nature of other receivables and the credit risk features of various counterparties, the Group classifies other receivables into two portfolios: portfolio of reserve funds receivable and portfolio of other receivables.
Contract assets	Based on the nature of contract assets and the credit risk features of various counterparties, the Group classifies contract assets into two portfolios: receivables of electricity tariff from customers and receivables from other customers.
Long-term receivables	The Group's long-term accounts receivable primarily consist of finance lease receivables. When calculating the provision for bad debts of long-term accounts receivable, the Group considers all long-term accounts receivable as a single portfolio and does not further differentiate between various customer bases.

(b) Judgment criteria of accrual of provision for bad debts on an individual basis

For notes receivable, accounts receivable, receivables financing, other receivables, contract assets, and long-term accounts receivable, the Group generally measures loss provisions based on the portfolio of credit risk features. If a counterparty's credit risk features differ significantly from those of other counterparties within the portfolio, or if there are significant changes in the credit risk features of that counterparty, loss provisions shall be made on an individual basis for the receivables from that counterparty. For example, if a counterparty encounters serious financial difficulties and the expected credit loss rate for receivables from that counterparty is significantly higher than that corresponding to their aging range, loss provisions shall be made on an individual basis.

Rather low credit risks

If the default risk of a financial instrument is rather low, the borrower has a strong ability to fulfill its contractual cash flow obligations in a short period and, even if there are adverse changes in the economic situation and operating environment for a long period of time, it may not be necessary for the borrower to reduce the ability to fulfill its contractual cash flow obligations, the financial instrument shall be considered to have rather low credit risks.

The Group believes that monetary funds deposited in reputable financial institutions with high credit ratings pose low credit risk.

Significant increase in credit risks

The Group assesses whether the credit risk of financial instruments has significantly increased since the initial recognition by comparing the default risk of financial instruments on the balance sheet date and on the initial recognition date.

When determining whether the credit risk has significantly increased since the initial recognition, the Group considers the reasonable and well-founded information obtained by it without unnecessary additional cost or effort, including the forward-looking information. The information to be considered by the Group is as follows:

- The debtor fails to pay the principal and interest by the contract expiration date;

- A significant deterioration (if any) in the external or internal credit ratings of a financial instrument, whether it has occurred or is anticipated;

- A significant deterioration in the operating performance of the debtor, whether it has occurred or is anticipated;

- Changes in the existing or expected technical, market, economic or legal environment will have a significant adverse impact on the debtor's ability to repay the Group.

The Group considers that a default of a financial asset occurs when:

- The borrower is unlikely to pay in full what is owed to the Group and the assessment does not take into account any recourse actions that the Group may take, such as the realization of collateral (if held).

Credit-impaired financial assets

The Group assesses, on the balance sheet date, whether there is any credit impairment to financial assets measured at amortized cost and debt investments at fair value through other comprehensive income. When one or more events that have an adverse effect on the expected future cash flows of a financial asset occur, the financial asset becomes a credit-impaired financial asset. Evidence for credit-impaired financial assets includes the following observable information:

- The issuer or debtor is caught in a serious financial difficulty;

- The debtor breaches the agreement of contract, such as default or overdue payment of interest or principal, or other default;

- The Group grants concessions to the debtor due to economic or contractual considerations related to the debtor's financial difficulties, which would not be made under any other circumstances;

- There lies a great probability of bankruptcy or other financial restructuring for the debtor;

- The issuer or debtor is caught in financial difficulties, which leads to the disappearance of the active market of the financial asset.

Presentation of provision for expected credit loss

In order to reflect the changes in the credit risk of financial instruments since the initial recognition, the Group remeasures the expected credit loss on each balance sheet date. The increase or reversal amount of loss provision therefrom shall be regarded as impairment loss or gain and included in the current profit and loss. For financial assets measured at amortized cost, the loss allowance offsets the carrying amount of the financial asset listed in the balance sheet; for debt investments at fair value through other comprehensive income, the Group recognizes its loss provision in other comprehensive income and will not offset the carrying amount of the financial asset.

Write-off

When the Group no longer reasonably expects that the contractual cash flows of the financial asset can be recovered in whole or in part, the book balance of the financial asset is directly written down. Such write-down constitutes the derecognition of related financial assets. This usually happens when the Group determines that the debtor has no assets or sources of revenue to generate sufficient cash flows to repay the amount to be written down. However, according to the Group's procedures for recovering due amounts, written-down financial assets may still be affected by implementation activities.

If the write-down financial assets are recovered later, they shall be regarded as the reversal of impairment loss and included in the current profit and loss.

(7) Equity instruments

When the Company issues equity instruments, they shall be included in shareholders' equity at the actual issue price. The related transaction costs shall be deducted from shareholders' equity (capital reserve). If the capital reserve is insufficient to cover these costs, surplus reserve and undistributed profits shall be offset in order. For the consideration and transaction costs related to the repurchase of the Company's equity instruments, the shareholders' equity shall be decreased.

For the repurchase of the Company's shares, the repurchased shares shall be managed as treasury stock, and all related expenditures shall be classified as the cost of treasury stock, with appropriate records maintained for future reference. Treasury stock does not participate in profit distribution and is presented as a deduction from shareholders' equity in the balance sheet.

Upon the cancellation of treasury stock, the share capital shall be decreased by the total par value of the canceled stock. For any portion of the cost of the treasury stock that exceeds the total par value, capital reserve (share premium), surplus reserve, and undistributed profits shall be offset in order. Conversely, if the cost of the treasury stock is below the total par value, the capital reserve (share premium) shall be increased for the portion below the total par value.

When treasury shares are transferred, the capital reserve (share premium) shall be increased for any portion of the transfer proceeds that exceeds the cost of the treasury shares. For any portion lower than the cost of the treasury shares, the capital reserve (share premium), surplus reserve, and undistributed profits shall be offset in order.

(8) Convertible instruments

- Convertible instruments with equity components

For convertible instruments issued by the Group that can be converted into equity shares, with a fixed number of shares and consideration at the time of conversion, the Group classifies them as composite financial instruments with both liability and equity components.

At the time of initial recognition, the Group separates the relevant liability and equity components. First, it determines the fair value of the liability component (which may include the fair value of any non-equity embedded derivatives). Subsequently, the fair value of the liability component is deducted from the fair value of the composite financial instrument to derive the value of the equity component, which is included in equity. The transaction costs incurred from the issuance of compound financial instruments shall be amortized between the liability component and equity component according to their respective proportions in the total issue price.

After initial recognition, the liability component not designated at fair value through profit or loss shall be measured at amortized cost using the effective interest method. The equity component shall not be remeasured after the initial measurement.

The taxable temporary differences arising from the equity instrument components of convertible bonds at initial recognition are recognized by the Group as deferred tax liabilities, and their effects are included in owner's equity. In subsequent measurement, with the amortization of the discount related to the financial liability components of convertible bonds, the change in the amount of relevant deferred tax liabilities is included in current profit and loss.

During the conversion of convertible instruments, the Group transfers the liability and equity components to their respective equity-related accounts. When a convertible instrument is redeemed, the redemption price and any transaction costs incurred shall be allocated to the equity and liability components. The allocation method for the price and transaction costs must align with the method used at the time the instrument was issued. After the allocation of the price and transaction costs, any difference between these amounts and the carrying amount of the equity and liability components shall be included in equity if it pertains to the equity component, or in profit and loss if it pertains to the liability component.

- Other convertible instruments without equity components

For other convertible instruments without equity components issued by the Group, the derivative component is measured at fair value at the time of initial recognition, while the remaining portion is classified as the initially recognized amount of the principal debt instruments.

After initial recognition, the derivative component shall be measured at fair value, with any gains or losses resulting from changes in fair value included in the current profit and loss. The principal debt instrument is measured at amortized cost using the effective interest method.

During the conversion of convertible instruments, the Group transfers the principal debt instruments and derivative components to equity-related accounts. When a convertible instrument is redeemed, the difference between the redemption price and the carrying amount of the principal debt instruments and derivative components shall be included in profit and loss.

16. Inventories

√ Applicable □ Not Applicable

Inventory category, inventory valuation methods, inventory system, and amortization method for low-value consumables and packaging materials

√ Applicable □ Not Applicable

(1) Inventory category

Inventory includes raw materials, work-in-progress, semi-finished products, finished products, and revolving materials. Revolving materials refer to low-value consumables, packaging materials, and other items that can be reused multiple times but do not meet the definition of fixed assets.

In addition to the purchase cost of raw materials, work-in-progress and finished products also include direct labor, as well as production and manufacturing overhead, which are allocated proportionately based on normal output.

(2) Inventory valuation methods

The actual costs for the issued inventory are measured using the weighted average method.

(3) Inventory system

The Group adopts the perpetual inventory system.

(4) Amortization methods for low-value consumables and packaging materials

Low-value consumables, packaging materials, and other revolving materials are amortized using the one-off write-off method and are included either in the cost of the relevant assets or in the current profit and loss.

Recognition criteria and accrual method for the provision for decline in the value of inventories
√ Applicable □ Not Applicable

On the balance sheet date, inventories are measured by cost or net realizable value, whichever is lower. The provision for decline in the value of inventories shall be made based on the difference between the cost calculated as per a single inventory item and its net realizable value, and shall be included in the current profit and loss.

The net realizable value of raw materials held for production is determined based on the net realizable value of the finished products made by the aforesaid raw materials. The net realizable value of inventory held for the execution of sales contracts or service contracts shall be calculated on the basis of the contract price. If the quantity of inventories held is greater than ordered quantity of the contract, the net realizable value of the excessive part shall be calculated based on the general selling price.

Portfolio category and determination basis for provision for decline in the value of inventories made on a portfolio basis and determination basis for net realizable value of different inventories
□ Applicable √ Not Applicable

Calculation method and determination basis for net realizable value of inventories recognized based on inventory age

Judgment criteria of identification and accrual of provision for bad debts on an individual basis
□ Applicable √ Not Applicable

18. Held-for-sale non-current assets or disposal group
√ Applicable □ Not Applicable

Where the Group primarily recovers the carrying amount of a non-current asset or disposal group through sales other than ongoing use, the non-current asset or disposal group shall be classified as held-for-sale.

Recognition criteria and accounting treatment method for non-current assets and disposal groups classified as held-for-sale
√ Applicable □ Not Applicable

(a) Initial measurement and subsequent measurement

The Group recognizes the non-current assets or disposal groups meeting all the following conditions as held-for-sale:

- The non-current assets or disposal groups are immediately marketable at the current status based on the practice in similar transactions;

- Their sales are very likely to occur, as the Group has adopted a resolution regarding a sales plan and signed a legally binding purchase agreement with other parties, with the expectation that the sales will be completed within one year.

The Group initially and subsequently measures held-for-sale non-current assets (excluding financial assets (see Note V. 11) and deferred tax assets (see Note V. 37)), as well as investment properties or disposal groups that are subsequently measured using the fair value model, at the lower of the carrying amount or the net amount obtained by deducting the selling expenses from the fair value. The difference between the carrying amount and this net amount is recognized as an asset impairment loss and included in the current profit and loss.

Recognition criteria and presentation method for discontinued operations
√ Applicable □ Not Applicable

The Group defines a discontinued operation as a separately identifiable component that complies with one of the following conditions and has been disposed of or classified as held-for-sale:

- Such a component represents an independent main business or a separate main operation region;

- Such a component is a part of one associated plan for disposing of one independent main business or one separate main operation region;

- Such a component is a subsidiary acquired exclusively for resale.

For discontinued operations presented in the current period, the Group presents profit or loss from continuing operations and profit or loss from discontinued operations separately in the current income statement. Additionally, information originally presented as profit or loss from continuing operations in the income statement during the comparison period is presented as profit or loss from discontinued operations during comparable accounting periods again.

19. Long-term equity investments

√ Applicable □ Not Applicable

Long-term equity investments include equity investments in subsidiaries, joint ventures, and associates. If the Group is able to exercise significant influence over an investee, the investee shall be regarded as an associate of the Group.

(1) Determination of long-term equity investment cost

(a) Long-term equity investment formed by business combination

- For long-term equity investments in subsidiaries acquired through a business combination under common control, the Company recognizes the share of the carrying amount of the owners' equity from the combined party in the consolidated financial statements of the ultimate controlling party as the initial investment cost of these long-term equity investments. The owners' equity refers to that acquired on the date of the combination. The difference between the initial investment cost of the long-term equity investment and the carrying amount of the consideration paid shall be treated as an adjustment to the share premium in the capital reserve. If the share premium in the capital reserve is not sufficient to absorb the difference, surplus reserve and undistributed profits shall be offset in order.

- For long-term equity investments in subsidiaries acquired through a business combination not under common control, the Company recognizes their initial investment cost based on the fair value of the assets paid, the liabilities incurred or assumed, and any equity securities issued to obtain control over the acquiree on the acquisition date.

(b) Long-term equity investments acquired by other methods

- For long-term equity investments acquired through methods other than business combinations, at initial recognition, the Group takes the actual purchase price paid as the initial investment cost for investments acquired in cash. For investments acquired through the issuance of equity securities, the initial investment cost shall be based on the fair value of the issued equity securities.

(2) Subsequent measurement and recognition method of gains and losses of long-term equity investment

(a) Investment in subsidiaries

In the Company's individual financial statements, long-term equity investments in subsidiaries are measured subsequently using the cost method. Any portion of the cash dividends or profits declared and distributed by the investee that is attributable to the Company is recognized as current investment income.

(b) Investment in joint ventures and associates

A joint venture refers to an arrangement jointly controlled by the Group and other joint parties, in which rights are held only over its net assets (see Note V. 19(3)). Associates refer to the enterprises on which the Group has the ability to exert significant influence (see Note V. 19(3)).

During subsequent measurement, long-term equity investments in joint ventures and associates shall be accounted for using the equity method, unless they meet the criteria for classification as assets held for sale (see Note V. 18).

After acquiring investments in joint ventures and associates, the Group recognizes investment income and other comprehensive income based on its share of the net profit or loss and other comprehensive income of the investees, adjusting the carrying amount of the long-term equity investments accordingly. The due share of profits is calculated based on the profit distribution or cash dividends declared by the investees, resulting in a corresponding reduction of the carrying amount of the long-term equity investments. For changes in owners' equity of joint ventures or associates other than net profit or loss, other comprehensive income, and profit distribution (hereinafter referred to as "other changes in owners' equity"), the Group includes these changes in stockholders' equity based on its proportionate share, while also adjusting the carrying amount of the long-term equity investments.

The Group's share of unrealized profit or loss arising from internal transactions with its joint ventures and associates is calculated proportionally and offset when applying the equity method. For unrealized losses incurred during these internal transactions, if there is evidence indicating that such losses are impairment losses on the underlying assets, those losses are recognized in full.

The net loss incurred by the Group's joint ventures or associates is limited to the extent that the carrying amount of the long-term equity investment and other long-term interests that substantially constitute the net investment in these joint ventures or associates are written down to zero, unless the Group has obligations to cover additional losses. When the joint ventures or associates subsequently realize net profits, the Group will recover its share of the recognized profits after offsetting the previously unrecognized share of losses.

(3) Basis for determining the existence of joint control or significant influence over investees

Joint control refers to shared control over an arrangement in accordance with relevant agreements, where decisions regarding the arrangement's related activities (i.e., those that significantly impact its returns) can only be made with the unanimous consent of all participants sharing the control rights.

In determining whether joint control exists, the Group typically considers the following factors:

- Whether any participant can independently control the investee's relevant activities;

- Whether decisions involving the investee's relevant activities require unanimous consent from all parties sharing the control rights.

Significant influence means that the Group has the power to participate in the financial and operating policy decisions of the investee but it has no control or joint control over the formulation of those policies.

20. Investment properties

(1). If measured at cost

Depreciation or amortization method

Investment properties, including land use rights that have already been leased out, buildings that are held for the purpose of leasing and buildings that are being constructed or developed for future leasing, are measured initially at cost. Subsequent expenditures incurred in relation to an investment property are included in the cost of the investment property when it is probable that the associated economic benefits will flow to the Group and their costs can be reliably measured; otherwise, the expenditures are included in the current profit and loss when incurred.

Investment properties of the Group are measured subsequently by the cost model, and depreciated or amortized using the straight-line method over their useful life.

Item	Estimated Useful Life	Estimated Net Residual Value Rate	Annual Depreciation Rate
Premises and buildings	20-60 years	5%	1.58% to 4.75%
Land use rights	Subject to the useful life in the Land Use Right Certificate		

When investment properties are transferred to owner-occupied properties, they shall be reclassified as fixed assets or intangible assets at the date of the transfer. When owner-occupied properties are transferred out for earning rentals or for capital appreciation, the fixed assets or intangible assets shall be reclassified as investment properties at the date of the transfer. When such a transfer occurs, the carrying amount before transfer shall be the recorded value after transfer.

The investment property's estimated useful life, estimated net residual value and depreciation (amortization) method applied shall be reviewed and adjusted as appropriate at each year-end.

An investment property is derecognized on disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposal. The net amount of proceeds from sale, transfer, scrapping or damage of an investment property after its carrying amount and related taxes and expenses is recognized in profit or loss for the current period.

When the recoverable amount of investment properties is lower than its book value, the book value shall be written down to the recoverable amount (refer to "V. 27. Impairment of long-term assets").

21. Fixed assets

(1). Recognition conditions

√ Applicable □ Not Applicable

The initial cost of purchased fixed assets includes the purchase price, related taxes, and any expenses attributable to the assets incurred before they are ready for their intended use. The initial cost of self-built fixed assets is determined in accordance with Note V. 22.

If the components of fixed assets have different useful lives or provide economic benefits to the Group in different ways, and if different depreciation rates or methods apply, the Group recognizes each component as a separate fixed asset item.

Subsequent expenditures on fixed assets, including those related to the replacement of a component, shall be capitalized and included in the cost of the fixed assets when it is probable that the associated economic benefits will flow to the Group. In such cases, the carrying amount of the replaced component shall be deducted accordingly. In contrast, expenditures related to routine maintenance of fixed assets shall be included in the current profit and loss when incurred.

(2). Depreciation method

√ Applicable □ Not Applicable

Category	Depreciation Method	Depreciation Life (Year)	Residual Value Rate	Annual Depreciation Rate
Premises and buildings	Straight-line method	20-60 years	5%	1.58% to 4.75%
PV power stations	Straight-line method	20-25 years	5%	3.80% to 4.75%
Machinery and equipment	Straight-line method	5-10 years	5%	9.50% to 19.00%
Motor vehicles	Straight-line method	5-10 years	5%	9.50% to 19.00%
Electronic equipment and others	Straight-line method	3-5 years	5%	19.00% to 31.67%

At least at the end of every year, the Group shall re-check the useful life, expected net residual value, and depreciation methods of the fixed assets.

22. Construction in progress

√ Applicable □ Not Applicable

The Group's costs for construction in progress are determined based on actual construction expenditures. These costs include various necessary construction materials, direct labor, borrowing costs that meet capitalization conditions (see Note V. 23), and other necessary expenses incurred prior to the asset being ready for its intended use.

Self-constructed fixed assets are transferred to fixed assets once they are ready for their intended use. Prior to that transfer, they are classified as construction in progress and are not subject to depreciation.

The Group's construction in progress shall be reclassified as fixed assets once it is completed and ready for its intended use. The criteria and timing for determining the conditions of intended use shall meet one of the following conditions:

- The physical construction (including installation) of fixed assets has been completed or substantially completed.
- Purchased and constructed fixed assets are consistent or substantially consistent with the design or contract requirements. Any minor discrepancies with the design or contract do not affect their normal use.
- There is little to no expenditure on the purchased and constructed fixed assets.

For purchased and constructed fixed assets requiring trial production or trial operation, the asset is considered ready for its intended use when trial production results demonstrate consistent production of acceptable products, or when trial operation results confirm normal functionality.

23. Borrowing costs

√ Applicable □ Not Applicable

The Group capitalizes the borrowing costs directly attributable to the acquisition, construction, or production of assets eligible for capitalization and includes them in the cost of the relevant assets. Other borrowing costs are recognized as financial expenses in the current period when incurred.

During the capitalization period, the Group determines the amount of capitalized interest (including the amortization of any discount or premium) for each accounting period using the following methods:

- For special borrowings used for the acquisition, construction, or production of assets eligible for capitalization, the Group calculates the amount of capitalized interest based on the current interest expenses of these borrowings calculated at the effective interest rate, minus any interest income earned from unused borrowings deposited in banks or investment income from temporary investment of such unused borrowings.

- For general borrowings used for the acquisition, construction, or production of assets eligible for capitalization, the Group calculates the amount of capitalized interest by multiplying the weighted average of the excess of the accumulated asset expenditures over the asset expenditures of special borrowings by the capitalization ratio of the general borrowings utilized. The capitalization rate is calculated based on the weighted average effective interest rate of the general borrowings.

The Group determines the effective interest rate of borrowings as the interest rate used to discount the future cash flows of the borrowings over the expected duration, or applicable shorter period, into the initially recognized amount of the borrowings.

During capitalization, the exchange differences arising from the principal and interest of special foreign currency borrowings shall be capitalized and included in the cost of the assets eligible for capitalization. However, the exchange differences resulting from the principal and interest of foreign currency borrowings other than these special borrowings shall be recognized as financial expenses and included in the current profit and loss.

24. Biological assets

□ Applicable √ Not Applicable

25. Oil and gas assets

□ Applicable √ Not Applicable

26. Intangible assets

(1). Useful life and determination basis, estimates, amortization method or review procedures

√ Applicable □ Not Applicable

For intangible assets with limited useful life, the Group amortizes the cost of these assets over their expected useful life, net of the estimated residual value and accumulated impairment provisions, unless the intangible assets are classified as held-for-sale (see Note V. 18).

The useful life, determination basis, and amortization method of various intangible assets are described below:

Item	Useful Life (Year)	Basis of Determination	Amortization Method
Land use rights	30-50 years	Subject to the useful life in the Land Use Right Certificate	Straight-line method
Patent rights	4-12 years	Benefit period	Straight-line method

ERP/software	4-10 years	Benefit period	Straight-line method
Others	3-14 years	Benefit period	Straight-line method

At least at the end of each year, the Group shall re-check the useful life and amortization methods of intangible assets with limited useful life.

The Group regards intangible assets for which future economic benefits cannot be foreseen as intangible assets with indefinite useful life and does not amortize them. As of the balance sheet date, the Group had no intangible assets with indefinite useful life.

(2). Categorization scope of R&D expenditures and relevant accounting methods

√ Applicable □ Not Applicable

Expenditures for internal R&D projects of the Group are divided into expenditures at the research stage and expenditures at the development stage. If the Group approves a project as a basic theoretical research project aimed at providing theoretical guidance or technical reserves for applied research, the related expenditures are typically classified as expenditures at the research stage and are included in the current profit and loss when incurred. Conversely, if a project is approved as an applied research project, it is deemed to have entered the development phase upon successful completion of the project initiation review.

Expenditures at the research stage shall be included in the current profit and loss when incurred. Expenditures at the development stage shall be capitalized when the products or processes being developed are technically and commercially feasible, the Group has sufficient resources and a clear intent to complete the development, and the expenditures can be reliably measured. Other development expenditure shall be recognized as expenses when incurred.

For the external sales of products or byproducts generated during the Company's research and development process, the related revenue and costs shall be subject to accounting treatment separately in accordance with the *Accounting Standards for Business Enterprises No. 14—Revenue* and the *Accounting Standards for Business Enterprises No. 1—Inventories*. These amounts shall be included in the current profit and loss.

27. Impairment of long-term assets

√ Applicable □ Not Applicable

On the balance sheet date, the Group assesses whether there are any signs of impairment for the following assets, based on both internal and external information:

- Fixed assets
- Construction in progress
- Right-of-use assets
- Intangible assets
- Long-term equity investments
- Goodwill

- Long-term prepaid expenses

The Group conducts impairment tests on assets with signs of impairment and estimates their recoverable amounts. Furthermore, regardless of whether there are any signs of impairment, the Group estimates the recoverable amount of intangible assets that are not yet ready for its intended use at least annually. The recoverable amount of goodwill and intangible assets with indefinite service life is also estimated at the end of each year. The Group amortizes the carrying amount of goodwill based on the benefits that relevant asset groups or portfolios of asset groups can derive from the synergies of the business combination and conducts goodwill impairment tests accordingly.

The recoverable amount is the higher of the net fair value (see Note V. 39(2)) of an asset (or an asset group or portfolio of asset groups, similarly hereinafter) less disposal costs, and the present value of the asset's expected future cash flows.

The asset group consists of assets that generate cash flows and can be recognized as the smallest asset portfolio. The cash inflows generated by this asset group are basically independent of other assets or asset groups.

The present value of an asset's expected future cash flows shall be recognized using an appropriate discount rate, based on the expected future cash flows generated during the continued use and final disposal of the asset.

Where the recoverable amount of an asset is estimated to be lower than its carrying amount, the carrying amount shall be written down to the recoverable amount. The write-down amount shall be recognized as an asset impairment loss and included in the current profit and loss. Simultaneously, the provision for asset impairment shall be made accordingly. Impairment losses associated with an asset group or portfolio of asset groups shall first be deducted from the carrying amount of goodwill allocated to that asset group or portfolio of asset groups, and then from the carrying amount of other assets (excluding goodwill) within the asset group or portfolio of asset groups, in proportion to their carrying amounts. However, the carrying amount of various assets after the deduction shall not be lower than the net fair value of the assets less disposal costs (if determined), the present value of the assets' estimated future cash flows (if determined), or zero, whichever is higher.

Once recognized, the asset impairment losses shall not be reversed in future accounting periods.

28. Long-term prepaid expenses

√ Applicable □ Not Applicable

Expenses incurred with a benefit period of more than one year are recognized by the Group as long-term prepaid expenses.

Long-term prepaid expenses shall be amortized evenly on a straight-line basis over the expected beneficial period. The amortization periods for the expenses are as follows:

Item	Amortization Period
Decoration and renovation cost	2-10 years

Others	2-10 years

29. Contract liabilities

√ Applicable □ Not Applicable

The Group's obligations to transfer goods or services to the customer due to customer consideration received or receivable shall be presented as the contract liabilities. The Group presents the contract assets and contract liabilities under the same contract on a net basis.

30. Employee benefits

(1). Accounting treatment of short-term benefits

√ Applicable □ Not Applicable

During the accounting period in which employees provide services, the Group recognizes the following items as liabilities and includes them in the current profit and loss or in the cost of relevant assets: employee wages, bonuses, medical insurance premiums, work-related injury insurance premiums, and other social insurance premiums, as well as the housing provident fund. These amounts are recognized as actually incurred or accrued according to prescribed criteria and proportions.

(2). Accounting treatment method of post-employment benefits

√ Applicable □ Not Applicable

The defined contribution plan in which the Group participates is implemented in accordance with applicable Chinese laws and regulations. It includes basic pension insurance within the social security system, administered by government agencies, in which the Group's employees are enrolled. The contribution amount for basic pension insurance is calculated based on the standards and proportions stipulated by the state. During the accounting period in which employees provide services, the Group recognizes the payable amount as a liability and includes it in the current profit and loss or the cost of relevant assets.

(3). Accounting treatment method of termination benefits

√ Applicable □ Not Applicable

The Group provides compensation for terminating the employment relationship with employees before the end of the employment contracts or as an offer to encourage employees to accept voluntary redundancy before the end of the employment contracts. The Group recognizes a liability arising from the termination benefits, with a corresponding charge to profit or loss for the current period at the earlier of the following dates:

- When the Group cannot unilaterally withdraw an employment termination plan or a curtailment proposal;

- When the Group has a detailed and formal restructuring plan that involves the payment of the termination benefits; and the restructuring plan has been initiated or its main content has been communicated to the affected parties, creating reasonable expectations that the Group will proceed with the restructuring.

(4). Accounting treatment methods of other long-term employee benefits

□ Applicable √ Not Applicable

31. Provisions

√ Applicable □ Not Applicable

The Group recognizes obligations related to contingencies as provisions when the following conditions are all met: The obligations are current obligations of the Group; fulfilling these obligations is likely to result in an outflow of economic benefits from the Group; and the amount of the obligations can be reliably measured.

Provisions are initially measured based on the best estimate of the expenditure required to fulfill the relevant current obligations. If the time value of money has a significant impact, the provisions are determined based on the present value of the expected future cash flow. When determining the optimal estimate, the Group comprehensively considers such factors as relevant risks and uncertainties related to contingencies and the time value of currency. If there is a contiguous range for the required expense and occurrence possibilities for various results in the range are the same, the best estimate shall be determined as per the median within this range; in other cases, the best estimate is dealt with as follows:

- If the contingency involves a single item, the estimate shall be determined as per the most probable amount;

- If the contingency involves multiple items, the estimate shall be determined based on all possible outcomes and their associated probabilities.

On the balance sheet date, the Group reviews the carrying amount of provisions and adjusts it based on the current best estimate.

32. Share-based payment

√ Applicable □ Not Applicable

(1) Types of share-based payments

The Group's share-based payment is an equity-settled share-based payment.

(2) Accounting treatment related to the implementation of share-based payment plan

- Equity-settled share-based payment

When the Group uses shares or other equity instruments as consideration in return for services provided by employees, it measures them at the fair value of the equity instruments granted to employees on the grant date. For share-based payment transactions where the rights of equity instrument are exercisable immediately after the grant, the Group includes these transactions in the relevant cost or expenses at the fair value of the equity instruments on the grant date. In such cases, the capital reserve is increased accordingly. For share-based payment transactions where the rights of equity instruments cannot be exercised until the service in the vesting period is completed or the specified performance conditions are met, the Group makes the best estimate of the number of equity instruments with exercisable rights on each balance sheet date within the vesting period. This estimate is based on the latest available information, such as changes in the number of employees eligible to exercise the rights. On this basis, the Group includes the services received during the current period in the relevant costs or expenses at the fair value of the equity instruments on the grant date, and increases the capital reserve accordingly.

If the modification of share-based payment arrangement increases the fair value of equity instruments granted, the Group shall include the incremental fair value granted in the measurement of the amount recognized for services received accordingly. The incremental fair value granted is the difference between the fair value of the modified equity instrument and that of the original equity instrument, both estimated as at the date of the modification. If the Group modifies the terms or conditions of the equity instruments in a manner that reduces the total fair value of the share-based payment arrangement, or is not otherwise beneficial to the employees, the Group shall nevertheless continue to account for the services received as consideration for the equity instruments granted as if that modification had not occurred (other than a cancellation of some or all the equity instruments granted).

If a grant of equity instruments is cancelled during the vesting period, the Group shall account for the cancellation as an acceleration of vesting, and shall therefore recognize immediately the amount that otherwise would have been recognized for services received over the remainder of the vesting period. Meanwhile the capital surplus shall be recognized. If an employee or another party can choose whether to meet a non-vesting condition, the Group shall treat the employee or the party's failure to meet that non-vesting condition during the vesting period as a cancellation.

33. Other financial instruments including preferred shares and perpetual bonds

□ Applicable √ Not Applicable

34. Revenue

(1). Accounting policies used for revenue recognition and measurement disclosed by business type

√ Applicable □ Not Applicable

The Group recognizes revenue at the amount of the consideration which the Group expects to be entitled to receive when the customer obtains control over relevant goods or services.

Revenue refers to the gross inflow of economic benefits formed during the course of ordinary activities of the Group, which may increase the shareholders' equity and is irrelevant to the invested capital of shareholders.

The Group recognizes revenue when it has fulfilled its obligations under the contract, specifically when the customer has gained control over the relevant goods or services.

If the contract contains two or more performance obligations, the Group shall, at the commencement date of the contract, apportion the transaction price to each performance obligation according to the relative proportion of the individual selling price of the goods or services promised by each performance obligation, and measure the revenue according to the transaction price apportioned to each performance obligation.

The transaction price is the amount of consideration that the Group is expected to be entitled to receive for the transfer of goods or services to the customer, excluding payments received on behalf of third parties. The transaction price recognized by the Group shall not exceed the amount of accumulative confirmed revenue that will most likely not be materially reversed when the relevant uncertainty is removed.

In case one of the following conditions is met, the Group will perform the performance obligations within a period of time. Otherwise, it will perform the performance obligations at a time point:

- The customer obtains and consumes the economic benefits brought by the Group while performing the contract;

- The customer can control the goods under construction during the Group's performance;

- The goods generated during the performance of the Group are irreplaceable, and the Group is entitled to collect the amount for the performance accumulatively completed so far throughout the term of the contract.

The Group determines whether it is the main responsible person or the agent during transactions according to its control over goods or services before transferring them to customers. If the Group has control over the goods or services before transferring them to customers, the Group is the main responsible person and recognizes the revenue according to the total consideration received or receivable; otherwise, the Group acts as an agent, and recognizes the revenue according to the amount of commission or handling charge expected to be entitled, which is determined according to the net amount of the total consideration received or receivable after deducting the price payable to other related parties, or according to the established commission amount or proportion.

The Group's entitlement to receive consideration after transferring goods or services to customers (and such entitlement depends on factors other than the passage of time) shall be regarded as contract assets. For these contract assets, impairment provision shall be made based on expected credit losses (see Note V. 11. (6)). The Group's unconditional (subject only to the passage of time) right to receive consideration from customers shall be presented as accounts receivables. The Group's obligations to transfer goods or services to the customer due to customer consideration received or receivable shall be defined as contract liabilities.

The specific accounting policies related to the main activities of the Group to obtain revenue are described as follows:

(a) Sales of goods

For sales to domestic customers, revenue is recognized either on the customer receipt date documented in the receipts after the goods are shipped or on the customer pickup date noted in the delivery order. For sales to overseas customers, revenue is recognized either on the shipping date specified in the bill of lading or on the customer receipt date indicated in the receipts. The credit period provided by the Group to customers is determined based on their credit risk features, which is consistent with industry practice, and there is no significant financing component.

(b) Revenue from PV power stations

For PV power stations, the Group recognizes revenue from PV power stations over a period of time, as customers simultaneously receive and consume the economic benefits derived from the Group's performance of contracts.

(c) Revenue from power station construction and services

The Group provides construction service to external parties. The related revenue is recognized based on the stage of completion within a certain period, which is determined based on proportion of costs incurred to date to the estimated total costs. On the balance sheet date, the Group re-estimates the stage of completion to reflect the actual status of contract fulfillment.

When the Group recognizes revenue based on the stage of completion, the amount with unconditional collection right obtained by the Group is recognized as accounts receivables, and the rest is recognized as contract assets. Meanwhile, loss provisions for accounts receivables and contract assets are recognized on the basis of expected credit losses (see Note V. 11. (6)). If the contract price received or receivable exceeds the amount for the completed service, the excess portion will be recognized as contract liabilities. The Group presents the contract assets and contract liabilities under the same contract on a net basis.

(d) Revenue from entrusted processing

For entrusted processing business, once the entrusting party confirms acceptance and signs for receipt, it is considered that the entrusting party has gained control of the relevant goods. The Group recognizes revenue using the net method, based on the sales price minus the cost of incoming materials.

(2). Recognition methods and measurement methods for the same kind of business with different business models and different revenue

□ Applicable √ Not Applicable

35. Contract costs

√ Applicable □ Not Applicable

Incremental cost incurred for obtaining contracts refers to the cost (such as sales commissions) that would not have occurred if the Group had not obtained the contract. If the cost is expected to be recoverable, the Group shall recognize an asset from the costs incurred to obtain a contract. Other expenses incurred by the Group for obtaining the contract, except the incremental cost that is expected to be recovered, shall be included in the current profit and loss when incurred.

If the costs incurred to fulfill a contract with a customer are not within the scope of another accounting standard for business enterprises (such as Inventories), the Group shall recognize an asset from the costs incurred to fulfill a contract only if the costs meet all of the following criteria:

- The costs directly relate to a contract or an anticipated contract, including direct labor, direct materials, manufacturing overhead (or similar costs), the costs clearly borne by the customer, and other costs incurred only by the contract;
- The costs increase the Group's resources for performing the performance obligations in the future;
- The costs are expected to be recovered.

Assets recognized from costs incurred to obtain a contract and assets recognized from costs incurred to fulfill a contract (hereinafter referred to as "assets related to contract costs") shall be amortized on the same basis as the revenue from goods or services related to the assets and included in current profit and loss. If the amortization period for assets recognized from costs incurred to obtain a contract does not exceed one year, the Group will include them in the current profit and loss when incurred.

When the carrying amount of assets related to contract costs is higher than the difference between the following two items, the Group will make an impairment provision for the excess and recognize it as an asset impairment loss:

- Residual consideration expected to be obtained by the Group in connection with the transfer of goods or services related to the assets;

- The cost expected to be incurred for the transfer of the relevant goods or services.

36. Government grants

√ Applicable □ Not Applicable

Government grants shall be recognized when all the attached conditions are satisfied and the government grants are receivable.

If government grants are monetary assets, they shall be measured at the amount received or receivable. If a government grant is a non-monetary asset, it shall be measured at the fair value.

The Group classifies government grants obtained for the acquisition, construction, or formation of long-term assets in other ways as government grants related to assets. Other government grants obtained by the Group other than those related to assets are classified as government grants related to income. Government grants related to assets shall be recognized as deferred income by the Group, and included in other income or non-operating income by stages on a reasonable and systemic basis over the useful lives of the assets. Government grants related to income that compensate the Group's future costs, expenses, or losses shall be recorded as deferred income and recognized in other income or non-operating income when the related costs or losses are recognized. Otherwise, such grants shall be directly included in other income or non-operating income.

37. Deferred tax assets/deferred tax liabilities

√ Applicable □ Not Applicable

The Group will include current income tax and deferred tax in the current profit and loss, except for the income taxes arising from the business combination or transaction or matters which are directly included in owner's equity (including other comprehensive income).

The current income tax refers to the expected income tax payable on taxable income for the current year, along with any adjustments to income tax payables from previous years. The expected income tax payable is calculated using the tax rates prescribed by applicable tax laws.

On the balance sheet date, current tax assets and current tax liabilities are presented on a net basis after offset if the Group has a legal right to settle on a net basis and intends either to settle on a net basis or to realize the assets and settle the liabilities simultaneously.

Deferred tax assets and deferred tax liabilities are determined separately based on deductible temporary differences and taxable temporary differences. Temporary differences refer to the differences between the carrying amounts of assets or liabilities and their tax bases, including deductible losses and tax credits that can be carried forward to subsequent years. Deferred tax assets are only recognized for deductible temporary differences to the extent that it is probable that taxable income will be available in the future against which the deductible temporary differences can be utilized.

If a single transaction is not classified as a business combination, no deferred tax will arise from the temporary differences generated by the transaction, provided that the transaction does not affect accounting profit or taxable income (or deductible losses) at the time it occurs, and the initially recognized assets and liabilities do not result in equal amounts of taxable temporary differences and deductible temporary differences. Additionally, temporary differences arising from the initial recognition of goodwill do not result in any related deferred tax.

On the balance sheet date, the Group measures the carrying amount of deferred tax assets and liabilities based on their expected recovery or settlement method, in accordance with applicable tax laws and the expected tax rates for the period in which the assets are recovered or the liabilities are settled.

On the balance sheet date, the Group reviews the carrying amount of deferred tax assets. If it is probable that sufficient taxable income will not be available in the future period to be used to deduct the benefit of the deferred tax assets, the carrying amount of the deferred tax assets is written down. Any such write-down is reversed to the extent that it becomes probable that sufficient taxable income will be available.

On the balance sheet date, deferred tax assets and deferred tax liabilities are presented on a net basis after offset when the following conditions are satisfied:

- The taxable entity has a legally enforceable right to settle current tax assets and current tax liabilities on a net basis;

- The deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

38. Lease

√ Applicable □ Not Applicable

Judgment basis and accounting treatment method for practical expedient of short-term leases and low-value assets with the Group as the lessee

√ Applicable □ Not Applicable

On the commencement date of a contract, the Group evaluates whether the contract is a lease or includes a lease. Where a party to a contract transfers the right to control the use of one or more identified assets for a certain period of time in return for a consideration, the contract is a lease or includes a lease.

If the contract includes multiple separate leases at the same time, the lessee and the lessor will split the contract and carry out accounting treatment for each separate lease. If the contract includes both lease and non-lease parts, the lessee and the lessor will split the lease and non-lease parts.

(1) The Group as the lessee

At the commencement of the lease term, the Group recognizes the right-of-use assets and lease liabilities for the lease.

The Group depreciates the right-of-use assets using the straight-line method. If there is reasonable certainty that the Group will obtain ownership of the leased asset by the end of the lease term, the asset is depreciated over its remaining useful life; otherwise, the leased asset is depreciated over the shorter of the lease term and its remaining useful life.

Lease liabilities are initially measured at the present value of lease payments that are not paid at the commencement date of the lease term. The discount rate is the interest rate implicit in the lease. If the Group is unable to determine the interest rate implicit in the lease, the incremental borrowing rate of the Group will be taken as the discount rate.

The interest expenses of the lease liabilities within each lease term are calculated by the Group according to the fixed periodic rate and included in the current profit and loss or the cost of relevant assets. The variable lease payment which is not included in the measurement of lease liabilities is included in the current profit and loss or the cost of relevant assets when it is actually incurred.

After the commencement of the lease term, in case of the following circumstances, the Group will remeasure the lease liabilities according to the present value of the changed lease payment:

- The amount expected to be payable according to the guaranteed residual value changes;
- The index or ratio used to determine the lease payment changes;
- The Group's evaluation result of the purchase option, renewal option, or option to terminate the lease changes, or the actual exercise of renewal option or option to terminate the lease is inconsistent with the original evaluation result.

When remeasuring the lease liabilities, the Group adjusts the carrying amount of the right-to-use assets accordingly. If the carrying amount of the right-of-use assets has been reduced to zero, but the lease liabilities still need to be further reduced, the Group includes the remaining amount in the current profit and loss.

For short-term leases (those with a term of 12 months or less) and low-value asset leases (the value is lower in the event of a brand new single leased asset), the Group chooses to include the lease payments in the cost of the relevant assets or in the current profit and loss on a straight-line basis over the lease term, instead of recognizing right-of-use assets and lease liabilities.

Lease classification criteria and accounting treatment method with the Group as the lessor

√ Applicable □ Not Applicable

On the commencement date of the lease, the Group classifies leases into finance leases and operating leases. A finance lease refers to a lease that substantially transfers almost all risks and rewards related to the ownership of the leased asset, regardless of whether the ownership is ultimately transferred. An operating lease refers to a lease other than finance leases.

When the Group acts as a sublease lessor, it classifies the subleases based on the right-to-use asset generated from the original lease instead of the underlying asset of the original lease. If the original lease is a short-term lease and the Group chooses to apply the practical expedient of the above short-term lease to the original lease, the Group classifies the sublease as an operating lease.

Under a finance lease, the Group recognizes the finance lease receivables and derecognizes the finance lease assets on the commencement date of the lease.

The Group calculates and recognizes interest income in each lease term at a fixed periodic rate. The derecognition and impairment of finance lease receivables shall be accounted for in accordance with the accounting policies described in "Note V. 11". The variable lease payment which is not included in the measurement of net lease investment is included in the current profit and loss when it actually occurs.

Lease receipts from operating leases are recognized as rental income on a straight-line basis over the lease term. The variable lease payment which is not included in the lease receipts is included in the current profit and loss when it actually occurs.

39. Other significant accounting policies and accounting estimates

√ Applicable □ Not Applicable

(1) Goodwill

For goodwill arising from a business combination not under common control, its initial cost is calculated as the difference between the combination cost and the fair value of the net identifiable assets acquired from the acquiree.

The Group does not amortize goodwill; it is presented in the balance sheet at cost less accumulated impairment provisions (see Note V. 27).

(2) Fair value measurement

Unless otherwise stated, the Group determines fair value based on the following principles:

Fair value refers to the price to be received for the sale of an asset or to be paid for the transfer of a liability by market participants in an orderly transaction on the measurement date.

When estimating the fair value, the Group takes into account the characteristics of the relevant assets or liabilities (including the conditions and location of the assets, and any restrictions on their sale or use), as evaluated by market participants when pricing these assets or liabilities on the measurement date. The Group also applies valuation techniques suitable for the current situation, supported by sufficient available data and other relevant information. Valuation techniques used mainly include the market approach, the income approach, and the cost approach.

(3) Dividend distribution

After the balance sheet date, dividends or profits to be distributed under the approved profit distribution plan are not recognized as liabilities on the balance sheet date. Instead, they are disclosed separately in the notes.

(4) Related party

Related parties exist when one party has the ability to exercise control, joint control or significant influence over the other. Two or more parties are related when they are subject to common control or joint control. Related parties may be individuals or enterprises. Enterprises solely under state control without other related party relationships do not constitute related parties.

In addition, the Group determines its related parties in accordance with the *Measures for the Administration of Information Disclosure of Listed Companies* issued by the CSRC.

(5) Debt restructuring

Debt restructuring refers to a transaction in which the creditor and the debtor reach a new agreement or the court renders a ruling on the time, amount or manner of repayment of the debt without changing the counterparty.

The Group as the creditor

If the debtor offsets its debts to the Group with non-financial assets such as inventories and fixed assets, the initial cost of the acquired non-financial assets shall be recognized according to the fair value of the waived creditor's rights, along with taxes and other relevant expenses directly attributable to the assets incurred to bring the assets to their current location and state or the conditions of intended use. The difference between the fair value and the carrying amount of the creditor's rights waived by the Group shall be included in the current profit and loss.

In addition, if the original creditor's rights are derecognized due to debt restructuring by modifying other terms, the Group shall initially measure the restructured creditor's rights at fair value according to the modified terms. The difference between the recognized amount of the restructured creditor's rights and the carrying amount on the date of derecognition of the original creditor's rights shall be included in the current profit and loss. If the modification of other terms does not lead to the derecognition of the original creditor's rights, those rights shall subsequently be measured according to the original classification. The gains or losses arising from the modification shall be included in the current profit and loss.

The Group as the debtor

If the Group, as a debtor, carries out debt restructuring by paying off debts with assets, it shall derecognize the relevant assets and liquidated debts when they meet the conditions for derecognition, and the difference between the carrying amount of liquidated debts and that of transferred assets shall be included in the current profit and loss.

In addition, if the original debt is derecognized due to debt restructuring by modifying other terms, the Group shall initially measure the restructured debt at fair value according to the modified terms. The difference between the recognized amount of the restructured debt and the carrying amount on the date of derecognition of the original debt shall be included in the current profit and loss. If the modification of other terms does not lead to the derecognition of the original debt, the original debt shall subsequently be measured according to the original classification. The gains or losses arising from the modification shall be included in the current profit and loss.

(6) Segment information

The Group determines the operating segments on the basis of the internal organizational structure, management requirements, and internal reporting system. Two or more operating segments can be combined into one operating segment, provided that they exhibit similar economic features and are identical or similar in terms of the nature of each product or service, the nature of the production process, the customer types of products or services, the methods of selling products or providing services, and the impact of laws and administrative regulations on the production of products or rendering of services. The Group determines its reporting segments based on operating segments, taking into account the principle of materiality.

During the preparation of segment reports, revenue from inter-segment transactions is measured based on actual transaction prices. The accounting policies used in the preparation of segment reports are consistent with those applied in the preparation of the Group's financial statements.

(7) Hedge accounting

Upon the commencement of the hedging relationship, the Group formally designates the hedging relationship and has prepared formal documents in written form pertaining to the hedging relationship, risk management objectives and risk management strategies. The documents indicate hedging instruments or hedged items, property of hedged risks and hedging effectiveness evaluation method of the Group. Hedging effectiveness refers to the extent that the variation of the fair value or cash flow of a hedging instrument can offset the fair value or cash flow of hedged items due to the hedged risks. Such hedging is continuously evaluated on the initially designated date and thereafter to meet the hedging effectiveness requirements.

If the hedging instrument is expired or sold, the contract is terminated or exercised (but the extension or replacement as part of the hedging strategy is not treated as expiration or termination), the hedging relationship no longer meets the risk management objectives due to the changes in risk management objectives, or the hedging no longer meets other conditions of the hedge accounting method, the Group will terminate the application of hedge accounting.

If the hedging relationship no longer meets the requirements for hedging effectiveness due to the hedge ratio, but the risk management objectives specified for the hedging relationship have not changed, the Group will re-balance the hedging relationship.

Where the conditions for hedge accounting methods are met, the following methods shall be used for treatment:

- Fair value hedge

Gains or losses arising from hedging instruments shall be included in the current profit and loss. If the hedging instrument is a non-trading equity instrument selected to be measured at fair value and whose changes are included in other comprehensive income, the gains or losses arising from the hedging instrument shall be included in other comprehensive income. Gains or losses of hedged items arising from risk exposure shall be included in the current profit and loss. If the hedged item is a non-trading equity instrument investment that is designated to be measured at fair value with changes included in other comprehensive income, the gains or losses arising from hedging risk exposure shall be included in other comprehensive income, and the book value of hedged items that are not measured at fair value shall be adjusted.

Where the hedged items are unrecognized firm commitments, accumulated changes to the fair value of the firm commitments as caused by the hedged risk shall be recognized as an asset or a liability, and relevant gains or losses shall be included in the current profit and loss. Changes in the fair value of the hedging instruments shall also be included in the current profit and loss.

- Cash flow hedge

The portion of gains or losses of hedging instruments effective for hedging shall be directly recognized as other comprehensive income, and the portion not effective for hedging shall be included in the current profit and loss.

If the hedged expected transaction is subsequently recognized as a non-financial asset or a non-financial liability, or if the expected transaction of a non-financial asset or a non-financial liability forms a firm commitment applicable to the fair value hedging, the amount of reserves for cash flow hedge originally recognized in other comprehensive income will be transferred out and included in the initial recognition amount of the asset or liability. For other cash flow hedges, during the period when the hedged expected cash flows affect the profit or loss, if the expected sales occur, the reserve for cash flow hedge recognized in other comprehensive income shall be transferred out and included in the current profit and loss.

When the Group terminates the use of hedge accounting for cash flow hedges, the amount previously included in other comprehensive income will not be transferred out until the expected transaction actually occurs or the commitment is confirmed to be fulfilled if the hedged future cash flows are still expected to occur; if the hedged future cash flows are no longer expected to occur, the accumulated amount of reserves for cash flow hedges shall be transferred from other comprehensive income and included in the current profit and loss.

- Hedge of a net investment in a foreign operation:

The portion of the gains or losses of hedging instruments that is determined to be effective hedging shall be included in other comprehensive income, and the portion of the ineffective hedging shall be recognized as the current profit or loss. During the disposition of overseas operations, the accumulated gains or losses included in other comprehensive income shall be transferred out and included in the current profit and loss if the hedged future cash flows are no longer expected to occur.

40. Changes in significant accounting policies and accounting estimates

(1). Changes in significant accounting policies

√ Applicable □ Not Applicable

Unit: Yuan, Currency: RMB

Contents and Reasons of Changes in Accounting Policies	Description of	Affected

	Statement Item Significantly Affected	Amount
In 2025, the China Securities Regulatory Commission issued the *Guidelines for the Application of Regulatory Rules—Accounting No. 5* (hereinafter referred to as "Accounting No. 5"), providing further handling opinions on the regulations regarding the initial recognition exemption of deferred tax in the *Accounting Standards for Business Enterprises No. 18—Income Tax* issued by the Ministry of Finance. Accounting No. 5 clarifies that when a company issues convertible bonds, if the taxable temporary difference does not meet the conditions for exemption from deferred tax liabilities, the deferred tax liabilities shall be recognized for the taxable temporary difference and its effect shall be included in owner's equity.	Refer to the table below for details.	

Other descriptions

The Group and the Company have adopted the above provisions in preparing the semi-annual financial statements for 2025. The comparative financial statements of the previous period have been restated accordingly, with specific impacts as follows:

Unit: Yuan, Currency: RMB

Description of Statement Item Significantly Affected	Amount of Affected Items in the Balance Sheet for the Group/the Company	
	December 31, 2024	January 1, 2024
Deferred tax liabilities		28,663,543.15
Deferred tax assets	-3,237,437.13	
Other equity instruments	-82,163,299.49	-82,166,341.70
Capital reserve	-38,849,606.34	-38,846,564.13
Undistributed profits	117,775,468.70	92,349,362.68

Description of Statement Item Significantly Affected	Amount of Affected Items in the Income Statement for the Group/the Company
	January to June 2024
Income tax expenses	-12,713,154.97

Main accounting estimates and judgments

When preparing the financial statements, the Group's management shall apply estimates and assumptions that have an impact on the application of accounting policies and the amounts of assets, liabilities, revenue, and expenses. The actual situation may differ from these estimates. The Group's management continuously evaluates the judgment of key assumptions and uncertain factors involved in the estimation. The impact of changes in accounting estimates is recognized in the current period and future periods.

(1) Main accounting estimates

Except for accounting estimates related to the depreciation and amortization of fixed assets, intangible assets, and other assets (see Note V. 21 and 26), as well as the impairment of various assets (see Note VII. 5, 6, 9, 10, 21, 22, 27, and Note XIX. 1 and 2), other main accounting estimates are as follows:

(a) As stated in Note V. 34, the Group's revenue related to construction services is recognized over a period of time. The recognition of construction service revenue and profit is based on the Group's estimation of contract outcomes and performance progress. The Group provides construction service to external parties. The related revenue is recognized based on the stage of completion within a certain period, which is determined based on proportion of costs incurred to date to the estimated total costs. If the actual total revenue and total costs incurred differ from the management's estimates, it will affect the amount of revenue and profit recognized by the Group in future periods.

(b) Note V. 37 - Recognition of deferred tax assets;

(c) Note V. 31 - Provisions related to quality assurance of guaranteed products;

(d) Note XIII - Fair value valuation of financial instruments.

(2) Main accounting judgments

The Group has made the following critical judgments in applying accounting policies:

Note VII. 46 and Note VII. 54 - Convertible bonds are classified as financial liabilities or equity instruments.

VI. Taxes

1. Main taxes and tax rates

Information on main taxes and tax rates

√ Applicable □ Not Applicable

Tax Category	Tax Basis	Tax Rate
VAT	Taxable value-added tax (taxable amount shall be subject to the balance of taxable sales amount multiplying applicable tax rate and then deduct the deductible income tax in current period)	13%, 9%, 6%, etc.
Urban maintenance and construction tax	VAT paid	7%, 5%, and 1%
Corporate income tax	Taxable income	9%, 12%, 15%, 25%, etc.
Educational surcharges	VAT paid	3%
Local educational surcharges	VAT paid	2%

Note: According to the *Announcement of the Ministry of Finance and the State Taxation Administration on the Implementation of the Policy of Deduction of Relevant Corporate Income Tax for Equipment and Appliance* (Announcement No. 37 [2023] of the Ministry of Finance and the State Taxation Administration), if the unit value of new equipment and appliances purchased by the Group's companies in China between January 1, 2024, and December 31, 2027, does not exceed RMB 5 million, such expenditures shall be included in current costs and expenses as a lump sum and deducted when calculating taxable income, without requiring annual depreciation.

If there are taxpayers with different enterprise income tax rates, the disclosure shall be as follows:

2. Tax preference

√ Applicable □ Not Applicable

(a) According to the *Announcement on Continuing the Enterprise Income Tax Policies for the Large-Scale Development of Western China* ([2020] No. 23), jointly issued by the Ministry of Finance, the State Administration of Taxation, and the National Development and Reform Commission, a corporate income tax rate of 15% applies to the Company and its eligible subsidiaries located in Western China from January 1, 2021, to December 31, 2030.

(b) According to the relevant provisions of the *Enterprise Income Tax Law of the People's Republic of China*, the Company and the Group's related subsidiaries have been recognized as high-tech enterprises. The high-tech enterprise certificate is valid for a period of 3 years. In 2025, the applicable corporate income tax rate was 15%.

(c) According to the *Announcement on Tax Policies for Further Supporting the Development of Small and Micro Enterprises and Individual Businesses* (Announcement [2023] No. 12 of the Ministry of Finance and the State Taxation Administration) jointly issued by the Ministry of Finance and the State Administration of Taxation, for the Company's subsidiaries that qualify as small and micro enterprises, the portion of their annual taxable income not exceeding RMB 3 million in 2025 shall be counted as taxable income at a reduced rate of 25%, with a corporate income tax rate of 20% applied.

(d) Pursuant to Article 27 of the *Enterprise Income Tax Law of the People's Republic of China* and Article 87 in the Implementation Regulations, for the income from the investment and operation of enterprises engaged in key public infrastructure projects supported by the government as required, starting from the tax year when the first revenue from production and operation occurs, the enterprise income tax is exempted from the first to the third year, while half of the enterprise income tax is reduced for the following three years.

According to the *Notice of the Ministry of Finance, the State Administration of Taxation, and the National Development and Reform Commission on Publishing the "Catalogue of Public Infrastructure Projects Eligible for Preferential Enterprise Income Tax Treatment* (2008)" (CS [2008] No. 116) and the *Notice of the Ministry of Finance and the State Administration of Taxation on Issues Concerning the Implementation of the Catalogue of Public Infrastructure Projects Eligible for Preferential Enterprise Income Tax Treatment* (CS [2008] No. 46), new solar power generation projects are included in the relevant catalogue.

The PV power station project companies within the Company can enjoy the "three-year exemption and three-year 50% reduction" preferential policy for corporate income tax if they meet the conditions described above.

(e) After registration, the Company's eligible subsidiaries established in the Ningxia Hui Autonomous Region may enjoy a tax rate of either 9% or 12%, in accordance with local policies.

(f) According to the relevant provisions of the *Announcement on Continuing the Implementation of Preferential Income Tax Policies for Enterprises in Hainan Free Trade Port* (Announcement [2025] No. 2 of Hainan Provincial Tax Service, State Taxation Administration), a corporate income tax rate of 15% is applicable to enterprises in encouraged industries that are registered and substantially operating in the Hainan Free Trade Port.

According to the relevant provisions of the *Notice on Preferential Corporate Income Tax Policy of Guangdong-Macao In-Depth Cooperation Zone in Hengqin* (CS [2022] No. 19) issued by the Ministry of Finance and the State Administration of Taxation, a corporate income tax rate of 15% is applicable to eligible industrial enterprises situated within the Guangdong-Macao In-Depth Cooperation Zone in Hengqin.

(g) According to the relevant provisions of the *Notice of the Ministry of Finance and the State Administration of Taxation on Value-added Tax Policies for Software Products* (CS [2011] No. 100), general VAT taxpayers who sell self-developed and self-produced software products, or localized imported software products, are eligible for the policy of "immediate VAT refund upon collection". This applies to the portion of their actual VAT burden that exceeds 3%, following the collection of VAT at a tax rate of 13%. This policy applies to certain subsidiaries of the Group.

(h) According to the relevant provisions of the *Announcement on Additional Value-added Tax Credit Policies for Advanced Manufacturing Enterprises* (CS [2023] No. 43) issued by the Ministry of Finance and the State Administration of Taxation, and the *Notice on Formulating the List of Advanced Manufacturing Enterprises Eligible for the Deduction Policies for Value-added Tax in 2025* (GXTLCH [2025] No. 217) jointly issued by the General Office of the Ministry of Industry and Information Technology, the General Office of the Ministry of Finance, and the General Office of the State Administration of Taxation, eligible advanced manufacturing enterprises are allowed to offset the VAT payable by a further 5% in addition to the current deductible input tax. This policy is effective from January 1, 2023, to December 31, 2027. This policy applies to certain subsidiaries of the Company.

(i) According to the *Announcement of the Ministry of Finance and the State Taxation Administration on Further Improving the Policies Regarding Pre-tax Deduction of Research and Development Expenses* (CS [2023] No. 07), for R&D expenses actually incurred by enterprises in R&D activities, which have not formed intangible assets and are not included in the current profit and loss, on the basis of actual deductions according to regulations, starting from January 1, 2023, an additional deduction of 100% of the actual amount incurred before tax will be made. For expenses that have formed intangible assets, from January 1, 2023, they will be amortized before tax at 200% of the cost of intangible assets.

Provision for bad debts according to the general model of expected credit loss
□ Applicable √ Not Applicable

Division basis and proportion of provision for bad debts at each stage

For notes receivables arising from ordinary operating activities such as sale of goods and rendering of services, the Group recognizes the lifetime expected credit losses regardless of whether there exists a significant financing component.

(i) Notes receivables for which the provision for bad debts is made on a portfolio basis are analyzed as follows:

The Group measures the provision for bad debts based on lifetime expected credit losses, and the Group believes that its notes receivables in the portfolio of bank acceptance notes and commercial acceptance notes do not expose to significant credit risk and will not cause significant losses from non-performance by these banks and issuers. Therefore, no provision for bad debts is made.

√ Applicable □ Not Applicable

From January to June 2025, certain bank acceptance notes were discounted and endorsed frequently by the Company and the certain subsidiaries of the Group for the purpose of daily treasury management. As a result, the balance of these bank acceptance notes was classified as financial assets at fair value through other comprehensive income and presented as receivables financing. In contrast, insignificant portion of the bank acceptance notes were endorsed or discounted and derecognized by other subsidiaries except for the above-mentioned subsidiaries. As a result, the eligible bank acceptance notes of these subsidiaries remained classified as financial assets measured at amortized cost.

□ Applicable √ Not Applicable

Provision for bad debts according to the general model of expected credit loss

□ Applicable √ Not Applicable

Division basis and proportion of provision for bad debts at each stage

As of June 30, 2025, as the credit risk characteristics of these bank acceptance notes were similar, no provision for impairment was made on an individual basis. The Group expected that there was no significant credit risk associated with its bank acceptance notes and did not expect that there would be any significant losses from non-performance by these banks.

Description of significant changes in the book balance of receivables financing that experienced changes in loss provision during the current period:

Reasons for reversal or write-off of provision for decline in the value of inventories in the current period
√ Applicable □ Not Applicable

Item	Specific Basis for Determining the Net Realizable	Reasons for Reversal of Provision for Decline in the Value of Inventories in	Reasons for Write-Off of Provision for

	Value	the Current Year	Decline in the Value of Inventories in the Current Year
Raw materials	Determine the net realizable value of raw materials primarily based on the market prices of the finished products.	The influence factors of the previous write-down of inventory value have disappeared, resulting in the net realizable value of inventories higher than their carrying amount.	External sales
Work in progress	Determine the net realizable value of work in progress primarily based on the market prices of the finished products.	The influence factors of the previous write-down of inventory value have disappeared, resulting in the net realizable value of inventories higher than their carrying amount.	Completion of production and external sales
Goods in stock	Goods in stock are divided into two categories: those without contract guarantees and those with irrevocable contract guarantees. For goods in stock without contract guarantees, the net realizable value is determined by deducting relevant expenses from the market price of the final products. In contrast, for goods in stock with contract guarantees, the net realizable value is calculated by deducting relevant expenses from the contract unit price.	The influence factors of the previous write-down of inventory value have disappeared, resulting in the net realizable value of inventories higher than their carrying amount.	External sales
Work in progress - outsourced	Determine the net realizable value of finished products primarily based on their market prices.	The influence factors of the previous write-down of inventory value have disappeared, resulting in the net realizable value of inventories higher than their carrying amount.	Outsourcing recovery and external sales
Goods in transit	Determine the net realizable value based on the contract unit price.	Not occurred in the current year	External sales

Other descriptions:

√ Applicable □ Not Applicable

In the current period, the Group planned to implement technical transformation and upgrades on certain production lines. As part of this initiative, certain fixed assets, including machinery and equipment, were scheduled to be disposed of in accordance with the technical plans. As a result, the Group made an impairment provision of RMB 331,541,864.66 for these assets. For the fixed assets, such as machinery and equipment, that are expected to be disposed of in the future, the Group's management determines their fair value based on the estimated disposal price less disposal expenses. These disposal expenses are calculated based on the projected transaction costs associated with the disposal of the assets and any relevant tax expenses.

(4). Impairment test of construction in progress

□ Applicable √ Not Applicable

Other descriptions

√ Applicable □ Not Applicable

From January to June 2025, the Group planned to implement technical transformation and upgrades on certain production lines of its subsidiaries. As part of this initiative, certain construction projects in progress were scheduled to be suspended according to the technical plans, along with the disposal of related machinery and equipment. As a result, the Group made an impairment provision of RMB 48,726,817.64 for these assets. For the assets, such as machinery and equipment, that are expected to be disposed of in the future, the Group's management determines their fair value based on the market disposal price less disposal expenses. These disposal expenses are calculated based on the projected transaction costs associated with the disposal of the assets and any relevant tax expenses.

Accounting treatment and judgment basis for transfer of equity

√ Applicable □ Not Applicable

As approved by the CSRC under document ZJXK [2021] No. 3561, the Company issued 70,000,000 convertible bonds on January 5, 2022, each with a par value of RMB 100. The bonds carry an annual coupon rate of 0.20% in the first year, 0.40% in the second year, 0.80% in the third year, 1.20% in the fourth year, 1.60% in the fifth year, and 2.00% in the sixth year. Interest is paid once a year, with both the principal and interest for the last year repaid upon expiration. For the convertible corporate bonds issued this time, the conversion period begins on the first trading day after six months from the date of issuance and extends until the maturity date of the bonds.

The initial conversion price for the convertible corporate bonds issued this time is RMB 82.65 per share. After this issue, the conversion price will be adjusted accordingly if the Company undertakes any of the following actions: distribute bonus shares, convert into share capital, issue new shares (excluding any increase in share capital resulting from the conversion of the convertible corporate bonds issued this time), make share allotment, and distribute cash dividends. During the existence of the convertible corporate bonds issued this time, when the closing price of the Company's shares is lower than 85% of the current conversion price for at least 15 of any 30 consecutive trading days, the Board of Directors of the Company has the right to propose a downward revision plan for the conversion price and submit it to the Company's general meeting of shareholders for voting.

Within five trading days following the maturity date of the convertible corporate bonds issued this time, the Company will redeem any unconverted bonds at 107% of their par value (including the interest for the last period).

During the conversion period of the convertible corporate bonds issued this time, if the closing price of the Company's A-shares is no less than at least 130% (inclusive) of the current conversion price for at least 15 of the 30 consecutive trading days, or if the remaining unconverted bonds amount to less than RMB 30 million, the Company has the right to redeem all or part of the unconverted convertible corporate bonds at the par value of the bonds plus the current accrued interest.

For the last two interest-bearing years of the convertible corporate bonds, if the closing price of the Company's A-shares is lower than 70% of the current conversion price for any 30 consecutive trading days, the holders of convertible corporate bonds have the right to sell all or part of their convertible corporate bonds back to the Company at the par value of the bonds plus the current accrued interest.

If there is any change in the utilization of the raised funds from the convertible corporate bonds issued this time compared to the commitments made by the Company in the prospectus, and if such a change is determined by the CSRC to constitute a change in the intended use of the raised funds, the holders of the convertible corporate bonds shall have the right to sell back all or part of convertible corporate bonds they hold at a price equal to the par value plus accrued interest. In such cases, holders of the convertible corporate bonds may sell back their bonds during the sell-back reporting period. If no sell-back occurs during that period, they will forfeit their additional sell-back rights.

On the issue date, the interest rate of the Company's recent comprehensive financing costs shall be used to estimate the fair value of the liability component of the bonds. The remaining portion of the bonds shall be recognized as the fair value of the equity component and included in shareholders' equity.

On May 20, 2022, the Company held its 2021 Annual General Meeting of Shareholders. During the meeting, the Company's 2021 annual plan for profit distribution and capital reserve capitalization was reviewed and approved. According to the plan, based on the total share capital of 5,412,952,708 shares as of the equity registration date for dividend distribution, the Company proposed to distribute a cash dividend of RMB 2.6 (tax inclusive) per 10 shares, totaling RMB 1,407,367,704.08 (tax inclusive) for all shareholders. Additionally, the Company proposed to transfer 4 shares for every 10 shares held by all shareholders through capital reserve capitalization. Upon completion of this capitalization, the Company's total share capital would increase to 7,578,133,791 shares.

On June 15, 2022, the Company held the 2nd meeting of the 5th Board of Directors and the 2nd meeting of the 5th Board of Supervisors in 2022. During these meetings, the *Proposal on Granting Stock Options and Restricted Shares to Incentive Participants* was reviewed and approved. Subsequently, on July 6, 2022, the registration procedures for the granted 3.472 million restricted shares were completed at the Shanghai Branch of China Securities Depository and Clearing Corporation Limited.

On May 18, 2023, the Company held its 2022 Annual General Meeting of Shareholders. During the meeting, the Company's 2022 annual profit distribution plan was reviewed and approved. According to the plan, based on the total share capital of 7,581,512,677 shares as of the equity registration date for dividend distribution, the Company proposed to distribute a cash dividend of RMB 4 (tax inclusive) per 10 shares, totaling RMB 3,032,605,070.80 (tax inclusive) for all shareholders.

On July 27 and August 14, 2023, the Company held the 9th meeting of the 5th Board of Directors and the 3rd Extraordinary General Meeting in 2023, respectively. During these meetings, the *Proposal on the Termination of the 2022 Stock Option and Restricted Stock Incentive Plan, Cancellation of Stock Options, and Repurchase and Cancellation of Restricted Stocks* was reviewed and approved. Subsequently, on October 20, 2023, the cancellation procedures for 3,360,000.00 restricted shares were completed.

On June 17, 2024, the Company held its 2023 Annual General Meeting of Shareholders. During the meeting, the Company's 2023 annual profit distribution plan was reviewed and approved. According to the plan, based on the total share capital of 7,578,043,524 shares as of the equity registration date for dividend distribution, the Company proposed to distribute a cash dividend of RMB 1.7 (tax inclusive) per 10 shares, totaling RMB 1,288,267,399.08 (tax inclusive) for all shareholders.

According to the terms of issuance and relevant regulations stipulated in the *Prospectus for Public Issuance of Convertible Corporate Bonds*, after the issuance of the "LONGi 22 Convertible Bonds", the conversion price shall be adjusted accordingly if the Company undertakes any of the following actions: distribution of bonus shares, conversion into share capital, and issuance of new shares (excluding any increase in share capital resulting from the conversion of the convertible corporate bonds issued this time), allotment of shares, and distribution of cash dividends. The conversion period lasts from July 11, 2022, to January 4, 2028, with an initial conversion price of RMB 82.65 per share. The conversion price was adjusted to RMB 58.85 per share following the completion of the 2021 annual dividend distribution, and to RMB 58.84 per share after the issuance of new restricted shares. Subsequently, the conversion price was adjusted to RMB 58.44 per share following the completion of the 2022 annual dividend distribution, and to RMB 58.45 per share after the completion of the termination of the 2022 stock option and restricted stock incentive plan, the cancellation of stock options, and the repurchase and cancellation of restricted stocks. Most recently, the conversion price was adjusted to RMB 58.28 per share following the completion of the 2023 annual dividend distribution. As the Company's share price triggered conditions for the downward revision of the conversion price of "LONGi 22 Convertible Bonds", the Company held the 3rd meeting of the 5th Board of Directors in 2025 on February 18, 2025. During the meeting, the *Proposal of the Board of Directors on the Downward Revision of the Conversion Price of the "LONGi 22 Convertible Bonds"* was reviewed and approved. At the 1st Extraordinary General Meeting in 2025 held on March 7, 2025, the *Proposal on the Downward Revision of the Conversion Price of the "LONGi 22 Convertible Bonds"* was reviewed and approved through a special resolution. Additionally, the Board of Directors was authorized to manage all matters related to this downward revision in accordance with relevant provisions, including those outlined in the *Prospectus for Public Issuance of Convertible Corporate Bonds* issued by the Company. This authority includes, but is not limited to, determining the revised conversion price, the effective date, and other necessary matters. On the same day, the Company held the 4th meeting of the 5th Board of Directors in 2025. During the meeting, the *Proposal on Determining the Downward Revision of the Conversion Price of the "LONGi 22 Convertible Bonds"* was reviewed and approved. As a result, the conversion price of the "LONGi 22 Convertible Bonds" was revised downward from RMB 58.28 per share to RMB 17.50 per share.

In alignment with the strategic plan and business requirements, the *Proposal on Changing the Xixian New Area LONGi Solar High-Efficiency Monocrystalline Cell Project with Annual Capacity of 15 GW* was reviewed and approved during the Company's two meetings: the 1st Extraordinary General Meeting of 2023 and the 1st Bondholders' Meeting of 2023 for the Convertible Corporate Bonds publicly issued in 2021. According to the proposal, the intended use of certain raised funds from the "LONGi 22 Convertible Bonds" has been changed. According to the additional put-back clause regarding the "LONGi 22 Convertible Bond" outlined in the *Prospectus for Public Issuance of Convertible Corporate Bonds*, the additional put-back clause regarding the "LONGi 22 Convertible Bond" has come into effect.

On February 21, 2023, the Company announced the results of the sell-back of the convertible bonds. During the sell-back reporting period for the "LONGi 22 Convertible Bonds", a total of 1,590 valid bonds were included in the sell-back, resulting in a total sell-back amount of RMB 159,063.60 (including interest).

In alignment with the strategic plan and business requirements, the *Proposal on Changing Certain Investment Projects by Raised Funds from Convertible Bonds in 2021* was reviewed and approved during the Company's two meetings: the 2022 Annual General Meeting of Shareholders and the 2nd Bondholders' Meeting of 2023 for the Convertible Corporate Bonds publicly issued in 2021. According to the proposal, the intended use of certain raised funds from the "LONGi 22 Convertible Bonds" has been changed. According to the additional put-back clause regarding the "LONGi 22 Convertible Bond" outlined in the *Prospectus for Public Issuance of Convertible Corporate Bonds*, the additional put-back clause regarding the "LONGi 22 Convertible Bond" has come into effect.

On June 6, 2023, the Company announced the results of the sell-back of the convertible bonds. During the sell-back reporting period for the "LONGi 22 Convertible Bonds", a total of 4,200 valid bonds were included in the sell-back, resulting in a total sell-back amount of RMB 420,630.00 (including interest).

As of June 30, 2025, a total of RMB 4,475,000 of the "LONGi 22 Convertible Bonds" had been converted into the Company's shares, with a total of 76,650 shares, accounting for 0.001% of the Company's total issued shares prior to the conversion of convertible corporate bonds. The amount of convertible bonds yet to be converted is RMB 6,994,946,000.00, representing 99.93% of the total issuance of convertible bonds.

Changes in other equity instruments in the current period, the reasons for the changes and the basis for the related accounting treatment:

√ Applicable □ Not Applicable

The increase in other equity instruments in the current period can be attributable to the triggering of the downward revision conditions on the conversion price. The conversion price of "LONGi 22 Convertible Bonds" was revised downward from RMB 58.28 per share to RMB 17.50 per share. This adjustment is expected to result in an increase in the number of convertible shares. The decrease in the current period was due to the effect of actual conversion.

(7). Supplier financing arrangements

The Group handles supplier financing business through the supply chain financial service platforms provided by banks or platform service providers. The original creditor (the Group's supplier) initiates an application through the platform, providing information on the accounts receivable and trade background documents. After review by the platform, an electronic debt certificate is generated and submitted to the Group for confirmation. The payment obligations of the Group under the electronic debt certificates are unconditional and irrevocable. They are not affected by commercial disputes among the parties involved in the circulation of the electronic debt certificates. The Group shall not claim offset or raise a defense regarding the payment liability. The Group will transfer an amount equal to that stated in the electronic debt certificate on the payment date in accordance with the platform business rules.

Items and related information presented in the balance sheet

Unit: Yuan, Currency: RMB

Item Presented	Ending Amount
Accounts payable	2,973,469,299.44
Including: The payments that the supplier has received from the financing provider	2,973,469,299.44

The date range of the Group's payments for supplier financing arrangements is due within 1 year. This is basically consistent with the date range of comparable accounts payable.

Other descriptions:

□ Applicable √ Not Applicable

2. Transactions in which the owners' equity in a subsidiary has changed and the subsidiary is still under control

□ Applicable √ Not Applicable

3. Equity in joint ventures or associates

√ Applicable □ Not Applicable

(1). Significant joint ventures or associates

√ Applicable □ Not Applicable

Unit: Yuan, Currency: RMB

Name of Joint Venture or Associate	Principal Place of Business	Place of Registration	Business Nature	Shareholding Proportion (%)		Accounting Treatment Method for Investment in Joint Ventures or Associates
				Direct	Indirect	
Sichuan Yongxiang	Leshan, Sichuan Province	Leshan	Production and sales	15.00		Equity method
Yunnan Tongwei	Baoshan, Yunnan Province	Baoshan	Production and sales	49.00		Equity method
Illuminate	The United States	Ohio	Production and sales		49.00	Equity method

Description of the difference between the shareholding percentage and voting rights percentage in joint ventures or associates:

None.

Basis for determining a shareholder holding less than 20% of the voting rights has significant influence, or a shareholder holding 20% or more of the voting rights does not have significant influence:

Although the Group holds less than a 20% share in Sichuan Yongxiang, it has appointed one of Sichuan Yongxiang's directors, allowing the Group to exert significant influence over the company. Consequently, Sichuan Yongxiang is classified as an associate for accounting purposes.

(2). Main financial information of significant joint ventures

Other descriptions

The Company holds a 24.24% equity interest in CENTER INT, which has been classified as an associate for accounting purposes since May 2021. As CENTER INT is a listed company, please refer to its 2025 semi-annual report for specific key financial information.

The Group calculates share of assets in proportion of the shareholding based on the amount attributable to the Company of associates in their consolidated financial statements. The amount in the consolidated financial statements of the associates has taken into account the impact of the fair value of the identifiable net assets and liabilities of the associates upon acquisition of investments in associates.

XII. Risks Related to Financial Instruments

1. Risks of financial instruments

√ Applicable □ Not Applicable

The Group's operating activities expose it to a variety of financial risks: market risk (primarily including foreign exchange risk and interest rate risk), credit risk, and liquidity risk. The Group's overall risk management plan focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial performance.

1. Market risk

(a) Foreign exchange risk

The Group's primary business operations are conducted in China and settled in RMB. Export sales are primarily settled in USD and EUR. The Group is exposed to foreign exchange risk arising from the recognized assets and liabilities, and future transactions denominated in foreign currencies, primarily with respect to USD and EUR. The Group's finance department at its headquarters is responsible for monitoring the amount of assets and liabilities, and transactions denominated in foreign currencies to minimize the foreign exchange risk. As of June 30, 2025, the Group had no foreign currency borrowings and did not enter into forward exchange contracts to mitigate the foreign exchange risk.

The financial assets and liabilities denominated in foreign currencies and held by the Group's subsidiaries, whose recording currency is RMB, are presented in RMB as follows:

Unit: Yuan, Currency: RMB

Item	USD	EUR	Other Foreign Currencies	Total
Financial assets denominated in foreign currency—				
Cash at bank and on hand	5,688,512,755.97	504,465,181.83	399,328,977.96	6,592,306,915.76
Accounts receivable	1,520,724,304.71	94,336,517.55	3,635,137.44	1,618,695,959.70
Other receivables	1,133,981.29	1,127,769.54	20,313,380.24	22,575,131.07
Total	7,210,371,041.97	599,929,468.92	423,277,495.64	8,233,578,006.53
Financial liabilities denominated in foreign currency—				
Accounts payable	147,714,952.03	5,366,748.92		153,081,700.95
Other payables	67,164,630.74	16,495,203.24	995,927.17	84,655,761.15
Total	214,879,582.77	21,861,952.16	995,927.17	237,737,462.10

As of June 30, 2025, for the Company's various financial assets and liabilities denominated in foreign currencies whose recording currencies are RMB, assuming all other factors remain constant, a 4% appreciation or depreciation of the RMB against foreign currencies would result in a change of approximately RMB 260,719,986.90 in the Group's net profit.

As of June 30, 2025, the financial assets and liabilities denominated in foreign currencies and held by the Group's subsidiaries, whose recording currencies are not RMB, were not significant when converted into RMB.

(b) Interest rate risk

The Group's interest rate risk mainly arises from long-term interest-bearing debts including long-term bank borrowings and bonds payable. Financial liabilities issued at floating rates expose the Group to cash flow interest rate risk. Financial liabilities issued at fixed rates expose the Group to fair value interest rate risk. The Group determines the relative proportions of its fixed rate and floating rate contracts depending on the prevailing market conditions.

The Group's finance department at its headquarters continuously monitors the interest rate position of the Group. Increases in interest rates will increase the cost of new interest-bearing debts and the interest costs with respect to the Group's outstanding interest-bearing debts with floating rates, and therefore could have a material adverse effect on the Group's financial performance. Management makes adjustments timely with reference to the latest market conditions and may enter into interest rate swap agreements to mitigate its exposure to interest rate risk. During the period from January to June 2025, the Group did not enter into any interest rate swap agreements.

2. Credit risk

The Group's credit risk is managed on a portfolio basis. Credit risk mainly arises from cash at bank, notes receivables, receivables financing, guarantee contracts, accounts receivables, and other receivables.

The Group expects that there is no significant credit risk associated with cash at bank since they are deposited at state-owned banks and other large and medium-sized listed banks, and the opening banks are relatively scattered. The Group does not expect that there will be any significant losses from non-performance by these counterparties.

The Group's debt investments and other debt investments are mainly fixed income bonds with high credit rating including treasury bonds and financial bonds. The Group has set the overall investment quota to limit the credit risk exposure, and reviewed and approved the investment quota annually. The Group will regularly monitor the credit risk exposure of bond investments, changes in credit ratings of bonds, and other relevant information, to ensure the overall credit risk of the Group is manageable.

The Group has policies to limit the credit risk exposure on notes receivables, accounts receivables, contract assets, and other receivables. The Group assesses the credit quality of and sets credit limits on its customers by taking into account their financial position, the availability of guarantee from third parties, their credit history, and other factors such as current market conditions. The credit history of the customers is regularly monitored by the Group. In respect of customers with a poor credit history, the Group will chase settlement by using written payment reminders, or shorten/cancel credit periods, to ensure the overall credit risk of the Group is limited to a controllable extent.

In addition, financial guarantees and loan commitments may expose the Group to credit risks from the default of counterparties. The Group has established strict application and approval requirements on financial guarantees and loan commitments, considering information including internal and external credit ratings, and continuously monitored the credit exposure and changes in credit ratings of counterparties and other relevant information, to ensure the overall credit risk of the Group is manageable.

As of June 30, 2025, the Group had no significant collateral or other credit enhancements held as securities from debtors.

3. Liquidity risk

Cash flow forecasting is performed by each subsidiary of the Group and aggregated by the Group's finance department at its headquarters. The Group's finance department at its headquarters monitors rolling forecasts of the Group's short-term and long-term liquidity requirements to ensure it has sufficient cash to meet operational needs, while maintaining sufficient headroom on its undrawn committed borrowing facilities from major financial institutions so that the Group does not breach borrowing limits or covenants on any of its borrowing facilities to meet the short-term and long-term liquidity requirements.

2. Hedging

(1). The Company conducts hedging business for risk management.

√ Applicable □ Not Applicable

Item	Corresponding Risk Management Strategy and Objectives	Qualitative and Quantitative Information on Hedged Risks	Economic Relationship between the Hedged Item and Relevant Hedging Instrument	Effective Realization of Expected Risk Management Objectives	Impact of Corresponding Hedging Activities on Risk Exposure

Futures contracts	To mitigate the impact of rising raw material prices on expected purchase costs and to control the purchase costs of raw materials, the Company has engaged in futures hedging business for commodities such as polysilicon.	The hedged risk pertains to the potential increase in the purchase costs of raw materials.	Futures contracts and the raw materials expected to be purchased are subject to opposing changes due to the same price fluctuation risks.	The Company has established a hedging-related internal control system to continuously track the hedging business and ensure the achievement of the expected risk management objectives.	Conducting hedging business enables the Company to fully utilize the hedging function of the futures market to mitigate the risk of rising raw material prices caused by commodity price fluctuations, thereby minimizing the impact on the Company's normal operations.

(3) Derivative financial assets	13,254,435.00			13,254,435.00
2. Designated financial assets at fair value through profit or loss				
(1) Debt instrument investments				
(2) Equity instrument investments				
(II) Other debt investments				
(III) Investments in other equity instruments			57,920,700.42	57,920,700.42
(IV) Investment properties				
1. Land use right for lease				
2. Buildings for lease				
3. Land use rights possessed and ready for transfer after appreciation				
(V) Biological assets				
1. Consumptive biological assets				

2. Bearer biological assets				
(VI) Receivables financing			222,472,872.27	222,472,872.27
Total assets measured at fair value on a recurring basis	316,081,458.20		280,393,572.69	596,475,030.89
(I) Financial liabilities held for trading				
1. Financial liabilities at fair value through profit or loss				
Including: Trading bonds issued				
Derivative financial liabilities				
Others				
2. Designated financial liabilities at fair value through profit or loss				
Current portion of non-current liabilities				
Total liabilities measured at fair value on a recurring basis				
II. Non-recurring fair value measurement				
(I) Held-for-sale assets				
Total assets measured at fair value on a non-recurring basis				
Total liabilities measured at fair value on a non-recurring basis				

2. Basis for determination of market prices for recurring and non-recurring level I measurement items at fair value

√ Applicable □ Not Applicable

For investments in equity instruments included in financial assets held for trading, the Company determines their fair value using the closing prices of stocks in the open market.

3. Qualitative and quantitative information on the valuation techniques and significant parameters used for recurring and non-recurring level II measurement items at fair value

□ Applicable √ Not Applicable

4. Qualitative and quantitative information on the valuation techniques and significant parameters used for recurring and non-recurring level III measurement items at fair value

√ Applicable □ Not Applicable

The fair value of financial instruments traded in an active market is determined at the quoted market price; and the fair value of those not traded in an active market is determined by the Group using valuation techniques. The valuation models used mainly comprise discounted cash flow model and market comparable corporate model. The inputs of the valuation technique mainly include risk-free interest rate, benchmark rate, exchange rate, liquidity premium, and liquidity discount shortage.

5. Reconciliation information between opening and ending carrying amounts and sensitivity analysis of unobservable parameters for recurring level III measurement items at fair value

□ Applicable √ Not Applicable

6. For recurring fair value measurement items that undergo transfers between different levels within the current period, the reasons for such transfers and the policy for determining the timing of the transfers

√ Applicable □ Not Applicable

The Group takes the date on which events causing the transfers between the levels take place as the timing specific for recognizing the transfers. No transfers between different levels occurred in 2024.

7. Change of valuation techniques incurred in the current period and the reasons thereof

□ Applicable √ Not Applicable

8. Fair value of financial assets and financial liabilities not measured at fair value

√ Applicable □ Not Applicable

The Group's financial assets and liabilities measured at amortized cost mainly include notes receivable, accounts receivable, other receivables, long-term receivables, short-term borrowings, notes payable, payables, lease liabilities, long-term borrowings, bonds payable, and long-term payables. The carrying amounts of other financial assets and financial liabilities not measured at fair value are a reasonable approximation of their fair value.

9. Others

□ Applicable √ Not Applicable

XIV. Related Parties and Related Party Transactions

1. Information of the parent company

√ Applicable □ Not Applicable

The Company operates without a parent company. The actual controllers are Li Zhenguo (holding 14.083% of shares) and Li Xiyan (holding 5.022% of shares), together owning a total of 19.105% of the shares.

The ultimate controlling parties of the Company are Li Zhenguo and Li Xiyan.

Description of related party guarantees

√ Applicable □ Not Applicable

On August 25, 2015, the Company issued a joint and several liability guarantee for the following obligations: RMB 122.01 million of the principal in a long-term loan, along with the corresponding interest, default interest, compound interest, compensation, liquidated damages, indemnities for damages, and expenses related to realizing creditor's rights. The total amount of the long-term loan is RMB 249 million, with a term of 15 years (from August 28, 2015, to August 27, 2030). This loan was executed between Tongxin LONGi, an associate of the Company, and Ningxia Hui Autonomous Region Branch of China Development Bank. The guarantee remains effective for two years following the expiration of the performance period for each debt obligation under the primary contract.

On August 25, 2015, the Company issued a joint and several liability guarantee for the following obligations: RMB 112.21 million of the principal in a long-term loan, along with the corresponding interest, default interest, compound interest, compensation, liquidated damages, indemnities for damages, and expenses related to realizing creditor's rights. The total amount of the long-term loan is RMB 229 million, with a term of 15 years (from September 15, 2015, to September 14, 2030). This loan was executed between Tongxin LONGi, an associate of the Company, and Ningxia Hui Autonomous Region Branch of China Development Bank. The guarantee remains effective for two years following the expiration of the performance period for each debt obligation under the primary contract.

On August 25, 2015, the Company issued a joint and several liability guarantee for the following obligations: RMB 37.24 million of the principal in a long-term loan, along with the corresponding interest, default interest, compound interest, compensation, liquidated damages, indemnities for damages, and expenses related to realizing creditor's rights. The total amount of the long-term loan is RMB 76 million, with a term of 15 years (from September 15, 2015, to September 14, 2030). This loan was executed between Tongxin LONGi, an associate of the Company, and Ningxia Hui Autonomous Region Branch of China Development Bank. The guarantee remains effective for two years following the expiration of the performance period for each debt obligation under the primary contract.

On August 28, 2015, the Company issued a joint and several liability guarantee for the following obligations: RMB 74.48 million of the principal in a long-term loan, along with the corresponding interest, default interest, compound interest, compensation, liquidated damages, indemnities for damages, and expenses related to realizing creditor's rights. The total amount of the long-term loan is RMB 152 million, with a term of 15 years (from September 15, 2015, to September 14, 2030). This loan was executed between LONGi Tianhua, an associate of the Company, and Ningxia Hui Autonomous Region Branch of China Development Bank. The guarantee remains effective for two years following the expiration of the performance period for each debt obligation under the primary contract.

6. Segment information

(1). Basis for determining reporting segments and accounting policies

√ Applicable □ Not Applicable

The Group's reporting segments consist of business units that provide distinct products or services or operate in different regions. Since different businesses and regions require varying technologies and market strategies, the Group independently manages the production and operational activities of its reporting segments and evaluates their operating results separately to inform resource allocation and assess performance.

During the period from January to June 2025, the Group had three reporting segments:

—PV product segment: primarily engaged in the production and sales of monocrystalline wafers and solar monocrystalline modules;

—PV power station segment: primarily engaged in the construction and operation of centralized and distributed power stations;

—Other segments: be responsible for the Group's investments, internal operation management services, and hydrogen energy business.

The inter-segment transfer price is determined based on the pricing used for sales to third parties.

Assets are allocated based on the operational activities of each segment and the location of the assets. Liabilities are allocated according to the operational activities of the segments, while expenses indirectly attributable to each segment are distributed among the segments based on their respective revenue ratios.

(2). Financial information of reporting segments

√ Applicable □ Not Applicable
